Our Latest Catalog of Fruits, Berries, Roses, Shrubs, Ornamental Trees, Evergreens, Perennial Flowers

It will pay you to plant a few acres of these two best selling Apples

BENTON COUNTY NURSERY CO.
ROGERS, ARKANSAS
By Way of Introduction

In presenting this catalogue, we desire to extend our thanks for the past patronage of our many customers, and to solicit your orders for the future. Our right to existence is based upon our service and no order is too large or too small to receive our careful attention.

We are always glad to consult with prospective customers and give them suggestions based upon personal knowledge of what others have found the most profitable and satisfactory under similar circumstances.

We strongly recommend that you buy NOW whatever you contemplate planting, and you will have that much more time to enjoy the satisfaction which comes from planting and it is not well to lose sight of the fact that we will be dead a long time after we leave this earth, and satisfaction now is better than the anticipated satisfaction of someone else. For commercial returns, the early bird gets the worm and while there seems no possible failure of the fruit demand for the future, yet the quicker you get your plants into bearing, and learn to properly make the fruit, the greater your advantage over those who plant next year, or "after a while."

We cannot accept orders for less than $1.00. Because of the heavy expense of packing and high rates on first pound by parcel post and express we cannot fill orders for less than $1.00, without loss to us and will ask you to make your orders amount to $1.00 and up.

C. O. D. Orders Must Have a Deposit Paid on Them. We are sorry that experience has taught us that it is a losing proposition to fill orders and make shipments unless a deposit has been paid on the order, our stock is perishable and must have prompt attention when it arrives at destination and we are compelled to ask a deposit of 25 per cent of the amount of the order as a guarantee of good faith. We guarantee satisfaction or your money refunded.

We feel confident, that all things considered, we can supply your wants better than anyone else, because of our knowledge of local problems you have to meet.

You can only have the highest quality of fruit if you grow it yourself because you can allow it to fully ripen on the trees before picking, where the last touch of rich and juicy goodness is added.

Plant this year; the only way to lower the cost of the fresh fruit you eat is to plant it yourself. Plant it right in your own dooryard; the more fruit your family eats the less calls your doctor will make, for good ripe fruit is nature's best regulator and appetizer.

You save from 75 to 100 per cent in buying direct from our Nursery through our catalog. Read what the U. S. Government Department of Agriculture says, in Farmers' Bulletin, about buying trees and plants: "If the farmer makes his purchase direct from the Nurseryman, he will save the expanse of the middleman or agent, and is less liable to the mistakes and injuries that will occur through repeated handling."

EARLY ORDERS. To one familiar with the rush of packing season, it must be obvious that it is impossible to fill an order requiring much time in its preparation on short notice without doing an injustice to others who have their orders previously booked. In fairness to all, we have adopted the practice of filling orders in the rotation received, unless orders are received far enough ahead of the packing season with instructions to ship at a given date, so that we can arrange a special shipping date. So we again say—place your orders as far in advance of shipping as you possibly can, stating when you would like the stock sent.

PACKING. We do not charge for packing, boxing or delivering to the Post Office, Freight or Express Companies at our station.

REFERENCES. Dun & Bradstreet Commercial Agents, American Association of Nurserymen, American National Bank, Rogers, Ark., or any business firm in Benton County.

Don't...

Don't Be Deceived by a high priced Salesman and Nurseryman into believing that their goods are better, because they are higher priced; he is only trying to make you pay him a large profit because he considers himself a smooth salesman, but get some of ours for comparison and you will be convinced that ours are as good as can be grown.

About Pedigreed Trees...

Some Nurserymen are making considerable noise and asking advanced prices for pedigreed trees. What are pedigreed trees? They are trees grown from buds and seedlings of bearing trees of select strains and from seeds that have proven they are extra good of their sort. This is simply what we have been doing for years; our trees should naturally be superior to others because their ancestors have been grown in this ideal central mountain climate.

We offer you pedigreed trees for less than one-half of what other nurserymen are asking you; you get the benefit of the large volume of our business, as we only figure a small profit on each order. And the reason why we are able to let...
you have pedigreed stock so cheap is due to the large number of orders we fill each year; growing and selling nursery stock will probably be our lifetime work, and it is our purpose to fill each order in a way that we will merit the good will and friendship of that customer for all time to come.

Who We Are . . .

We are a bunch of old fashioned, hard working, blue-eyed hill-billies, who grew up right here in these Ozark Mountains, on the farm, and made our living from what we could grow out of this mountain soil and all we know is to treat you exactly like we would want you to treat us if we were in your place and you were in ours. We would be "tickled pink" to work hard all the year and come out with a ten per cent profit.

What We Are . . .

We are natives of Arkansas, born and reared on farms in the Ozarks and our forefathers as far back as we can trace, have all been agricultural people, and we do not know from which European country they formerly came. In fact, they have been in America for many, many generations.

Where We Are . . .

We are located in Arkansas—in the northwest corner county (Benton), only twelve miles south of the Missouri line and twenty-six miles east of the Oklahoma line; eighty-one miles almost due north of Fort Smith, Arkansas, and eighty-three miles, almost due south, of Joplin, Missouri; one hundred twenty-nine miles east of Tulsa, Oklahoma, and one hundred six miles southwest of Springfield, Missouri, On Federal highway 71 and 62, just south of Rogers, Arkansas.

ON THE TIP TOP OF THE OZARK MOUNTAINS where our growing season is almost thirty days shorter than at Fort Smith, Arkansas. Our summers are short and nights are cool, and our growing season more like that of North Missouri, Iowa and Nebraska, than Eastern and Southern Arkansas.

Hence, our stock is well adapted to the extreme Northern, Eastern and Western States, as well as being the best for Southern States.

Nursery Salesmen . . .

All try to sell stock at much higher price than we ask you. Some will ask you three or four times as much. These salesmen are compelled to sell you something to try to get you to believe they have better stock because they are asking you more. They tell you that our trees will not bear, or that they are inferior in roots and growth. If this is true, why do the best fruit growers in Arkansas and America buy from us? We offer a list of thousands of satisfied customers and our guarantee is that you must be satisfied or your money refunded.

Thirteen Reasons Why You Should Buy From Us . . .

1—Because we sell you the best trees, plants and vines that can be produced at prices for below what others will ask you for the cheap, worthless kind. Our nursery stock is grown by the best method known to nurseries and no better can be produced regardless of prices. We offer $10.00 reward for improved method on how to grow better nursery stock.

2—Because we prepare the postage or express charges on all orders amounting to $10.00 and over, instead of billed or demanded.

3—Because we sell direct to the fruit growers saving you the Agent's or middleman's commission.

4—Because we guarantee satisfaction or your money refunded, and we pay postage or express both ways.

5—Because we do not belong to any trust or combine, and are free to make our prices just as low as we believe we can afford.

6—Because our trees and plants are guaranteed to be free from disease and insects, and have all been inspected by our State Inspector and each shipment bears a certificate of inspection.

7—Because we use every caution to keep all our varieties true to name and should a mistake occur, and another variety prove untrue to name we will replace it free of charge or refund the price paid for it.

8—Because we grow and offer for sale only varieties that are known to be good fruits and ornamentals.

9—Because Benton County, Arkansas, has many, many acres of varieties of fruits, and where our close observation has grown a greater variety of fruits and berries than our competitors.

10—Because Ozark Mountain, Arkansas Grown Nursery Stock is now considered by Horticulturists to be the best that can be produced.

11—Because trees and plants must be well rooted if success is to be made with them. Ours are the best to be had.

12—Because our old customers send us repeat orders and their neighbors send us their orders: a proof that they are well pleased.

13—Because we use extreme economy in both growing and selling our nursery stock, thereby saving money for you.

We guarantee our stock to be as good as the highest priced nurseries in the world and someone will ask us two to four times as much as we offer our stock for. We do not claim to have the best nursery stock grown, but we do claim to have as good as the best, and what we mean by the best is as good as the highest priced nurseries in America.

Two Things We Strive For . . .

1st. To grow as good stock and best varieties of all of Fruits, Berries and Ornamentals as are known to the Experiment Stations of America.

2d. To sell them at the lowest prices that one can possibly afford and we believe that we can produce the very best trees, plants, etc., as cheaply as any nursery in the United States, because there are many of the owners of this nursery constantly on the job and are personally overseeing all the growing of this stock, while many of the other stock, highest-priced nurseries leave all this to hired help who have no interest in the business except their pay check each Saturday night. Many, many mistakes are made that prove very expensive to this class of nurseries and they are compelled to pass this expense on to the customer. We are always on the lookout for the very best and most competent help to be had and we keep our expenses down to the minimum and get the best results possible, and pass this on to the customer in our HIGH QUALITY STOCK at the LOWEST POSSIBLE COST.

Our Guarantee . . .

Is that you must be satisfied or your money will be refunded for any items you purchase from us that are not what we represent them to be. Upon receipt of any stock ordered from us, if you are not perfectly satisfied, return it to us by express or mail and we will refund you all money paid us for the items returned and for all transportation charges paid by you. All claims except stock not true to name must be made within 30 days after receipt of order.

Our Aim . . .

What we try our very best to do, is to grow as good trees, plants and vines as can be grown and to grow the latest and most highly improved varieties of fruits and ornamentals and produce them as economically as we can.

If you know of anything better than the varieties we offer, we want you to write us about what you have. If we are convinced that it is better than what we are offering, we will try to get your permission to let us propagate it and offer it for sale.

IF YOU ARE UNABLE TO DECIDE just what varieties you want to plant, and will tell us about what time you will want your fruit to ripen, and the number of trees, we will select the varieties for you giving you the benefit of our knowledge as to the best kinds for your section. We will guarantee you to be pleased with results.

WE ALLOW 10 PER CENT OFF THE 100 RATE PRICES ON LOTS OF 1,000 AND UP ON APPLES, PEACHES, PLUMS, CHERRIES AND PEARS.

"Never Did See Trees Grow So Fast"

August 10, 1939

Dear Sirs:

I received an order of fruit trees and one hundred and ten Strawberry plants from you this Spring and I have not lost a tree. I never did see trees grow so fast. I bought eight trees from another company and just saved three of the eight, and I had paid $2.00 each. Your trees are twice as large as the three from the other company now.

Please send me one of your new catalogs when they are published.

Yours truly,

Mrs. Grant Cooper, R. No. 2, Wagoner, Oklahoma.

BENTON COUNTY NURSERY CO., ROGERS, ARKANSAS
Summers Apples

Early Red Bird. The earliest apple on our list, fiery-flaming red, from week to week before the Yellow Transparent. The earliest apples always bring the top prices, this one being of a very fine flavor, of good size and one of the very best for quality of any early apple yet introduced; makes it a winner for all American apple. The trees bear young, annually, and immense crops. It has sold for twice as much as Yellow Transparent on the same market. This variety should be planted in every home and commercial orchard. It starts the ripening season earlier and assures you of best prices.

Early Harvest. Tree healthy, vigorous and a good bearer. Fruit medium size, nearly round, somewhat flattened; surface smooth, clear, waxy, yellow; rarely blemished; flesh tender, juicy, acid to sub-acid flavor good. July.

Yellow Transparent. A Russian apple. The tree is a hardy upright grower; regular and early bearer, medium size. Color a rich, transparent yellow with a faint blush on sunny side; flesh melting, juicy, sub-acid.

Red Astrachan. Tree vigorous, upright; hardy and productive. Fruit medium to large; surface smooth, marbled and striped on greenish yellow; flavor acid.

Red June. Medium, red; flesh white, tender; juicy, good flavor. Abundant bearer. Best of June.

Summer Apples

ADA RED. Large, red, summer apple; ripens July 25th. A brilliant red, fine cooking apple as well as eating apple, large size, and bears heavy annual crops; begins to bear at three years, and ripens at a time when there are no other red apples on the market, and always commands the highest prices.

Old Fashioned Horse. Large, pale yellow, shaded with red; tender, juicy, sub-acid. Tree vigorous and very hardy; upright grower; bears early and abundantly. An old apple, famous for its fitness for cider, pies, drying, and all culinary purposes. When allowed to mellow to deepest gold, it is a delicious eating apple. We have the genuine old-fashioned Horse Apple. Ripens August.

Sweet Bough. A large, pale yellow apple, tender and sweet. Tree vigorous and long lived. August to early September.

Autumn Varieties

Delicious Apples

Delicious. Flourishes well in every state of Union. Bears annually; great yielder, hangs well on trees. Trees very thrifty, long lived and extremely hardy. Fruit very large, nearly covered with brilliant, dark-red, flesh fine grained, crisp, juicy, melting, acid delicious; splendid keeper and shipper, should be in every orchard.

Yellow Delicious. Large as the genuine Delicious, golden in color, delicious flavor; appears to be suited to all soils and climates; the tree bears very young and have heavy crops; the fruit is of the best quality, and will keep highest prices. Ripens in October and will keep until spring.

Red Delicious (Blood Red) (Triple Red). This Delicious is identical with the Genuine Delicious in size and flavor, but is a rich red in color; it is a beauty and always brings the highest prices; the quality is of the very best.
Crab Apples

Prices the same as other varieties on page 3 with the exception of Dolgo.

Crab apples are especially desirable in the colder sections as only a few varieties of apples can be successfully grown; but they succeed well in all climates and their fruit is very popular for preserves, jelly and some sorts are excellent for eating.

FLORENCE. The finest of the Crab apples. Tree of rather small size; coming into bearing when very young and producing heavily; the fruit setting in clusters. The apples will measure about an inch or slightly more in diameter; golden yellow with a bright cheek, or almost entirely red. The flesh is firm, fine grated and exceedingly juicy, with that distinct snapiness so relished in a crab apple.

WINESAP. Medium; dark red; sub-acid. Tree an abundant bearer. One of the finest cider apples grown, both on account of its over abundance of juice and its productiveness. November to April.

WINESAP. Large, roundish, deep red, medium quality; keeps well. A fair grower and good bearer. December to May.

Stayman Wineap

WINTER VARIETIES (Cont.)

STAYMAN WINESAP. Large, roundish, deep red, medium quality; keeps well; tree a fair grower and good bearer. December to May.

WINESAP. Medium; dark red; sub-acid. Tree an abundant bearer. One of the finest cider apples grown, both on account of its over abundance of juice and its productiveness. November to April.

WINTER BANANA. A highly prized and valuable market sort. Beautiful yellow fruit; flavor exquisite and very tempting; highest quality. Productive. Reliable growers represent it to be hardy north. Very popular for dessert.

CORTLAND. A late, winter keeper. This new apple originated at the New York Experiment Station. Of the many thousands of new varieties originated there the Cortland is considered the best; it is a cross between Ben Davis and McIntosh and possesses the good qualities of both which makes it one of the most profitable apples to grow; the quality is similar to the McIntosh.

PEACH TREES

Under 1 ft. high. 5c each; 1 to 2 ft. 8c each; $7.50 per 100.

These trees were grafted and planted in the nursery very late in the Spring, thus not putting on the growth they would have made, had they been set earlier. They are well rooted trees and first class stock and will soon make very fine trees. We have in this small grade:

- Yellow Transparent
- Grimes' Golden
- Delicious
- Stayman Wineap
- Black Ben Davis

GRAPE VINES

3c each; $3.00 per 100; $30.00 per 1,000.

These are well rooted grape vines (not merely cuttings). They were set out late and the dormant season this year kept them from making large vines. They will grow off well and make fine vines in one year. We only have in this grade: CONCORD.

ORNAMENTAL SHRUBS

10c each; $1.00 per dozen; $8.00 per 100.

These shrubs are well rooted and will grow into an extra fine plant in one year. The few weeks of drouth this summer retarded their growth this season. They are first class in every respect and you are sure to be well pleased with them. This lot will range in height from 10 to 24 inches and extra good plants: ALTHEA (Rose of Sharon) double white, red or pink; BARBERRY, Thunberg; DEUTZIA, Pride of Rochester; FORSYTHIA, Intermediate; HONEYSUCKLE, white or pink; MOX ORANGE, white; PRIVET, (hedge plants), Californis, Amoor River and Iblomion; SPIREA, Van Houtie; SNOWBERRY, Red; WEIGELIA, pink; HYPERICUM, (gold flower), yellow.

EVERGREENS

25c each; $2.50 per dozen; $18.00 per 100.

These Evergreens are young trees, from 2 to 4 years old. They are well rooted and well shaped and will in very few years make a fine specimen evergreen. Young evergreens transplant as a rule better than older trees. We offer the following kinds that will range in height from 10 to 20 inches: Norway Spruce, Black Hill Spruce, Juniperus Virginiana, American Arborvitae, Chinese Arborvitae, Golden Arborvitae, Scotch Pine and Austrian Pine. These small mail order size evergreens are not Balled and Burlapped.

BENTON COUNTY NURSERY CO., ROGERS, ARKANSAS
Cherries—Sweet, Sour, Hybrids

Cherry culture has been a success when proper attention has been given to the selection of varieties and their culture. The hardy, thrifty varieties of the Morello type may be freely planted with confidence of profitable results. The cherry tree should be planted in a naturally dry soil or the soil should be well drained, so that water may not remain near the roots for any considerable time.

DYTHOUSE. This variety partakes of both the Morello and Duke, wood and fruit. A very early and sure bearer, ripens a week before Early Richmond, is of better quality and productive. One May.

EARLY RICHMOND. Everywhere the most popular. Tree strong; grower, making a large, symmetrical head; fruit medium size, dark red, mellowing, juicy, sprightly, acid flavor and especially valuable for cooking purposes; tree an early and abundant bearer. Season last of May and first of June.

ENGLISH MORELLO. Tree moderate grower, hardy, an early and great bearer, the most valuable of the late varieties. Fruit large, round, skin dark red, becoming nearly black when fully ripe; flesh dark red, tender, juicy and of a pleasant sub-acid flavor when fully ripe. July.

LARGE MONTMORENCY. A fine large, light red cherry of the Richmond class but larger and more solid; a more upright grower, equally hardy and productive. Second only to Early Richmond in value. Ripens ten days later.

WRAGG. Originated in Iowa. Medium to large in size, long stem, dark purple when fully ripe. A variety well adapted for the prairie regions of the Northwest. Appears identical in tree and fruit with English Mor- ello, but is claimed to be a new variety. Valuable late cherry. July.

CHERRIES (Sweet)

SCHMIDT'S BIGARREAU. Very large, bright glossy black; half tender, juicy, rich and fine. Tree a rapid grower and good bearer. Last of June and first of July.

YELLOW SPANISH. Tree very large and vigorous; heart spreading. Fruit mid-season, color bright amber-yellow with a reddish blush. Flesh white, with tender aromatic sweet flavor. Freestone. Bears abundantly.

COMPASS CHERRY-PLUM. Originated in Minnesota through a cross between the native Sand cherry and the Miner plum. Like the Hansen hybrid plums, it possesses remarkable hardiness combined with enormous productiveness. In appearance the fruit resembles the plum more than the cherry but it has the bright red color of the cherry and the prolific fruiting habit of the Sand cherry. Ripens the last of June.

ST. ANTHONY. A Sand cherry hybrid of the breeding of Zumbra cherry. Fruit small to medium, round, dark purplish black; excellent for preserving. Ripens last of July.

Zumbra Cherries

A Benton County Nursery Booster

March 28, 1939

Dear Sir:

Being a native of your state I am accustomed to having a supply of fruits of all kinds, so I experiment quite a lot to see just what can be grown in East Texas where I now live.

My favorite fruit is the Cherry and as they are not grown here, I decided to try them on a small scale to just see what the outcome would be. In 1934 I ordered three small inaccessible Montmorency Cherry trees from you, and they came in good shape and grew off rapidly. For the past three years they have been bearing the fruit our family of five needed for pies and preserves. Last year I gathered about three or four pounds per tree and I had a hard time making my friends believe I grew them. As these are doing so well I mean to plant some for the market.

All the trees I have ordered from you are nice size, healthy, productive and bear quickly and they have no comparison with other nursery stock when it comes to price. I have ordered catalogues from everywhere but always go back to you when I get ready to buy.

I am glad to express my appreciation for your splendid service and excellent nursery stock.

May you continue to grow and prosper in business is my wish.

Yours very truly,

Mrs. R. P. Cameron

Atlanta, Texas.

SUPERB. Medium in size, light salmon color with numerous red or russet dots. Flesh yellow, firm and good. Fairly early.

MOORPARK. One of the largest and finest apricots. Yellow with red cheeks; flesh orange, sweet, juicy and rich parts from the stone. Very productive.

ORANGE. Large, roundish, yellow; cooks tender and is of excellent flavor. Valuable for preserves and flavoring. Productive. September and October.

CHAMPION. Fruit large, fair and handsome. Tree bears abundantly while young. Flesh cooks as tender as an apple without hard spots or cores; flavor delicate. The most valuable of all.

ZUMBRAS. Sand cherry hybrid produced by the Minnesota Experiment Station. The tree is a dwarf grower and produces its fruit in thick clusters along the limbs. Fruit small to medium, dark purplish black, round, crisp, juicy. Ripens last of July. Valuable for home and market.

CHAMPION Quince

Hardy Trees, Plants and Vines from the Heart of the Ozarks
Peaches, Extra Early to Extra Late

Everything that the name implies is expressed to the utmost in the word Peaches. Nothing can compare with a rich, ripe peach and especially when you take them right from your own trees. The flavor and sugar are stored fast by nature, and this is the quality lacking in shipped-in fruit. Peaches thrive on clay and sandy soils and do their best in rich, neutral soils. They are desirable for the apple orchard because they afford a quick wind protection for the young apple trees, and are usually out of the way before the apples need room. One or two crops will more than pay for the trees and land. We have closely observed the good and the objectionable qualities in many varieties and offer to our customers the varieties we have found to be the most hardy in fruit and bud and the most profitable for home and market, and which includes the earliest ripening sorts so that you can have ripe peaches for about five months of each year.

EXTRA EARLY

MAYFLOWER. Medium size, practically red all over; flesh firm and of good flavor; extremely valuable as a very early market sort especially for eastern states. Tree blooms very late; upright and good grower; prolific bearers. Earliest known. S-Cling.

EARLY VARIETIES

EARLY WHEELER. Semi-cling. Ripens about a week after Mayflower. Of good size, flesh firm, moderate texture. Color, light pinkish white on under side and bright crimson next to sun. This is the best peach of its season and the peach to ripen that really comes up to the standard of a first class peach.

RED BIRD CLING (Very Early). As large as Elberta. The fruit is bright red in color and the first big peach that is ready for market. A sensation in early bloom, vigorous, productive, and will bear no matter how large the peach. It ripens so early that it comes up to the standard of a first class peach.

MAMIE ROSS. Freestone, very early, white. The Mamie Ross is a large oval peach with a bright red cheek. The flesh is creamy white, very tender and the skin thin, making it an unusual good shipping peach for market. There is little that is more extra good. The best quality, very early peach.

ALTON. EARLY WHITE FREESTONE. Magnificent white freestone peach that is the best for home and market use. Better quality than Champion and handsomer than any picture ever painted. One of the sweetest and most luscious peaches, and no tree will bear more or bigger crops. L. L. Coleman, a South Missouri Orchardsman, says: “They have borne every year since they came into bearing. I know one fellow who has had them eight or nine years and they have missed but one crop.” E. A. Riehl, of Alton, always sells $1.50 per bushel for his Altons. Calvin R. Clark, of Scott Co., Iowa, says: “Finest peach I ever saw; brought three times the market price on the market and 15 times the others. Everything considered, Alton is the best and most prolific white peach in propagation.”

CARMEN (Freestone). The originator says it is either a sister or a seedling of the Elberta; tree of same manner and habit of growth, olive leaves, tender. Very attractive, hardy and productive, the fruit is practically not prone to split. As original tree, standing in low, wet ground, has perfected its fruit while other varieties all have rotted entirely. The fruit is broadly oval in form, large, pointed; skin a yellowish white, slightly tinged with red, of a sprightly varous flavor. The “New York” first described it some years ago as an extra large yellow peach, like “Elberta”, but it is not strictly a yellow peach, neither is it white.

A PEACH OF A PAIR

A young sister in my garden while I was eating a peach. We made a happy pair. I gave the young sister a peach and after enjoying and eating the peach asked for another. I gave her another, that made it a pair. The young sister ate the peach, making two pairs, and finished eating the pair and said that he had a peach of a time eating the two peaches or one pair, so the pair of us had a peach of a time.

—Today’s Magazine.

Size large, juicy, sweet and excellent, productive. Originated in Texas. Tree is a regular bearer. First of July.

EARLY ROSE (Clingstone). Ripe middle of June. Fruit brilliant, beautiful bluish all over. Flesh fine grained, tender and of best quality. Tree vigorous, hardy and an early bearer. Tends to overload, and should be thinned. Where this is done, the most beautiful peaches can be grown. They well bring and the very top price in the markets.

CHINESE CLING. Cling. Ripe July 20 to 25. A favorite peach of large size; creamy white with beautiful bluish flesh of the very highest quality; indeed the standard of richness among peaches.

CHAMPION (Freestone). A western peach of very large size and good quality, also noticeable for the regularity of its bearing. Skin is of a rich, creamy white with a red cheek; flesh creamy white; sweet and delicious, rich and juicy. A most profitable market peach. July 20th.

BELLE OF GEORGIA. Very large, skin white, with ripening blush white; firm and of excellent flavor; the fruit is uniformly large and showy, prolific. Chinese cling seedling. Freestone.

ELBERTA CLING—Mid Season Yellow Clingstone. An immense size yellow peach that looks like Elberta, but is a perfect clingstone. The tree is a sure and heavy cropper and the fruit of superb quality. Flesh firm, excellent shipper, goes on the market in good condition and brings top prices.

EARLY ELBERTA. Freestone, mid-season; yellow. The Early Elberta is truly named. It is of the Elberta type, large, golden yellow, which is in beautiful contrast to the rich bluish on the sunny cheek. The flesh is yellow like the Elberta but far better quality, sweeter and finer grained; better quality, higher color and a week earlier—going out as the Elberta is coming in. As a canning peach it has better flavor and color than the regular Elberta.

CRAWFORD'S EARLY. This magnificent large yellow freestone peach. Good quality and a beauty which makes it one of the most popular varieties. August.

ELBERTA. Large, yellow with red cheek; flesh yellow, firm, juicy, of high quality. Exceedingly prolific, sure bearer and hardy. It does well in all peach sections, North and South. One of the leading market varieties. August 1st.

LATE VARIETIES

LATE ELBERTA. Late yellow freestone. Best sort between Hale and Krummel. Looks just exactly like Elberta, but ripens two weeks after it. Better flavor. One of the best shippers, comes on market when yellow peaches bring top prices. Tree satisfactory in growth, bearing and hardiness. It has been one of our most satisfactory varieties. Late peaches are profitable. Fourteen days after Elberta. Cooking, eating, canning, market.

MAMMOTH HEATH CLING. Very late white. Best strain of the well known White Heath. Fruit tender, melting, juicy, luscious; firm; does not bruise easily and ships well. Tree good grower, hardy, 40 days after Elberta. Cooking, eating, market.

J. H. HALE. Genuine Hale budded from Bearing J. H. Hale Tree. This new variety has been brought out by advertising, rather than any sort for many years, and from reports that we have. It has been said. The fruit as we have seen it: Color is a deep yellow, overspread with carmine, except on the underside; skin is smooth without much fuzz; flesh firm, fine grained and unusually solid; pews freely from the stone; the flavor is most delicious, much better than yellow peaches usually run. Ripens a few days before Elberta.

Elberta Peach

Benton County Nursery Co., Rogers, Arkansas
And Promising New Peaches, Too!

**PROMISING NEW PEACHES**

We offer a few hundred each of the following most promising new peaches:

| Variety            | Rate per bushel
|--------------------|----------------
| 2 to 3 feet        | 14c
| 3 to 4 feet        | 18c
| 4 to 5 feet        | 27c
| 5 to 6 feet        | 35c
| 6 to 7 feet        | 40c

**OCTOBER BEAUTY** — Clarence. Ripens from 1st to 10th of October. Creamy yellow with red blush. Large; prolific; high quality.

**JUNE ELBERTA** — Semi-dling. Ripens about 30 days before Elberta. Large, deep red blush. High quality. Very productive.

**HILEY** — Freestone. Ripens about 10 days before Elberta. Large, creamy white with deep red blush, yellow meat, good quality and size.

**MURRY BEAUTY** — Freestone. Ripens about 10 days before Elberta. Large, creamy white with deep red blush, good quality and size.

**GOLDEN JUBILEE** — Freestone. Ripens about 20 days before Elberta. Yellow peach with deep pink blush. One of the hardest peaches known.

**ARKANSAS SEEDLING** — Large clingstone with pink blush. Ripens September 1st. One of the best varieties for making sweet pickles.

**IF YOU ARE UNABLE TO DECIDE what varieties you want to plant, and will tell us about what time you will want your fruit to ripen, and the number of trees, we will select the varieties for you giving the benefit of our knowledge as to best kinds for your section. We will guarantee you to be pleased with results.**

We also have a few hundred trees of the following varieties at lower rates as follows:

| Variety            | Rate per bushel
|--------------------|----------------
| 3 to 4 feet        | 21c
| 4 to 5 feet        | 30c
| 5 to 6 feet        | 42c
| 6 to 7 feet        | 50c

**LATE BELLE OF GEORGIA** — In the recent year in which the temperature dropped suddenly after 22 years, produced only one peach in our orchard and in Benton County. Why this is so is known. The cold was so severe that a great many apple and peach trees were killed outright, roots and all, while this tree was not damaged even on the most tender twigs. This peach resembles a Bell of Georgia and is a heavy bearer. The fruit is of medium size and excellent quality. It seems to be an exceptionally hardy tree. Ripening a good crop when others bear a very light crop or none at all on account of cold winters or springs. Fruit is white with a pink blush. It's a freestone and ripens 20 days after Elberta.

**GOLDEN SWEET** — Clingstone. Ripens ten days before Elberta. Larger than Elberta. Yellow or golden flesh. Prolific, fine quality.

**Palm Silvering** — Freestone. Ripens 20 days after Elberta; white peach with pink blush. Unusually attractive blossoms with long blooming period.

**ARKANSAS BLACK** — Another Brand New Peach

The Arkansas Black is the earliest peach known in this section. It ripens before the Mayflower; it is much larger than Mayflower and the most beautiful color we have yet seen for a peach. They are a very dark red getting almost black; clingstone and of good quality. They have a good color for several days before they are ripe, and for the time they are ripe the fine appearance they have and good quality make them sell like hot cakes.

No home can afford to be without a few trees of this wonderful extra early, fine quality, large size, and very attractive peach. Our attention was called to this new peach growing near Rogers. This variety is a late bloomer and escapes some of the late frost that often kills peach crops. The tree is very hardy and will stand much colder weather without being damaged than most any other variety. The winter of 1929-30, the coldest on record here, more than 25 below zero, did no damage to this tree, while many trees of other varieties were killed, roots and all, by the hard freeze. Price $1.50 per bushel; $3.00 per doz.; $25.00 per 100.

**Madison County Mammoth**

The largest peach we have ever known. The giant of the peach family. This peach originated in Madison County, Ark., and always took first prize when submitted for exhibition at fairs and fruit shows. The peach is yellow, overlaid with carmine. The texture is fine-grained and firm; the flavor is very pleasant, rich and juicy, which makes it one of the very best in quality. Ripens about 20 days after Elberta. Only a few trees for the market this season. 3 to 5 feet —— 40c each; $4.00 per dozen.

**Improved Elberta**

Rogers, Ark.

Sept. 6, 1930

This exceptional Elberta peach tree was an old tree when we came to Arkansas twelve years ago. It has produced heavy crops every year that any Elberta has ever produced. The fruit is almost round, with deep red blush on the side, it easily 4 to 5 inches in diameter with excellent flavor.

Two years ago a local fruit man gave me $5,000 for a bushel when he cured and was buying ordinary Elbertas for $1.50 to $2.00 per bushel which was presented to the president of the Frisco Railroad Co. This fruit dealer was informed by the railroad officials that the trees could produce a load of that quality of Elbertas and pay the grower $5.00 per bushel if they could be had. (Signed)

H. W. Doty, M.D.

Dr. Doty for a number of years had the largest peach orchard in the county and his tree was outstanding for its productivity.

Price: Each 5o; per dozen 3.00.

**Bliss Everbearing Peach**

A freestone. Red in color, good size and fine quality; begins to ripen about June 10th and continues until September 15th. A fine peach for home or commercial use.

Prices: 40c each; $4.00 per dozen.

J. H. Hale Peaches

The Largest and Finest Quality

August 2, 1929

On your files you will find that you shipped me by mail in the Spring of 1928, 50 peach trees which were set March 28, 1923. These one year old trees were in fine shape when received and well rooted. There were ten Elberta, ten Early Elberta, twenty J. H. Hale and ten Champion. These trees have outgrown and outshone any other trees in this section.

In 1926 we sold seventy-five bushels tree run at the orchard at $1.50 per bushel, while others sold for fifty cents per bushel. Besides this we sold one hundred and fifty-five crates for home use. In 1927 we sold one hundred and twenty-five boxes at $1.50 per bushel and canned one hundred quarts. Last year the freeze killed all fruit in this section, but this year the trees are loaded with fine quality of fruit, but not quite ripe at this date.

The enclosed picture shows the strain the trees were in holding up the enormous peaches, one-half of which were more than three inches in diameter, the largest and finest quality ever seen in our community.

S. B. Morre, College Grove, Tennessee.

Gentlemen:

On your files you will find that you shipped me by mail in the Spring of 1928, 50 peach trees which were set March 28, 1923. These one year old trees were in fine shape when received and well rooted. There were ten Elberta, ten Early Elberta, twenty J. H. Hale and ten Champion. These trees have outgrown and outshone any other trees in this section.

In 1926 we sold seventy-five bushels tree run at the orchard at $1.50 per bushel, while others sold for fifty cents per bushel. Besides this we sold one hundred and fifty-five crates for home use. In 1927 we sold one hundred and twenty-five boxes at $1.50 per bushel and canned one hundred quarts. Last year the freeze killed all fruit in this section, but this year the trees are loaded with fine quality of fruit, but not quite ripe at this date.

The enclosed picture shows the strain the trees were in holding up the enormous peaches, one-half of which were more than three inches in diameter, the largest and finest quality ever seen in our community.

Sincerely yours,

S. B. Morre, College Grove, Tennessee.

**Hardy Trees: Plants and Vines from the Heart of the Ozarks**
Big, Juicy, Gorgeous Colored Plums

Plums!—Appealing to the eye and satisfying to the appetite. Plums of Gold! Red Plums! Blue Plums! Apricots! Plums of Royal Purple! Plums “big as little peaches”—plums for everyone—everywhere. Be sure to plant some in your home orchard. The plums listed on these pages are the best we have found in our test.

**ABUNDANCE.** Large, roundish, freestone, amber, turning to a rich cherry color with a whitish bloom; flesh light yellow, juicy, tender, sweet and excellent, vigorous, and very productive. July.

**Burbank.** Large, nearly globular, clear cherry red, with thin lilac bloom; flesh deep yellow, rich, very sweet, with a peculiar and agreeable flavor. Vigorous and a very early bearer. Last of July.

**RED JUNE.** The best Japan plum, ripening before Abundance. Medium to large; deep vermilion red, with handsome blooms, flesh light lemon-yellow, firm, moderately juicy, fine quality. Tree upright, spreading, vigorous and hardy; productive.

**HANSKA PLUM.** The color of the Hanska when fully ripe is a deep bright red, with firm flesh and of high quality. When fully ripe they are fragrant like the apricot and when cooked the strong apricot flavor is brought out to perfection, entirely unlike any native plum. The fruit has a small pit. The tree is a profuse bloomer, grows tall and is of rapid growth. The trees often bear when they are only two and three years old. Freestone.

**HYBRID PLUMS**

**AMERICA.** Very early, hybrid. A full brother of Gold, the sensational $3,000 plum. Same parentage—a cross between Burbank (Japanese) and Robinson (Native). From this far-reaching experimental hybridizing of 20,000,000 crossed seedlings by the great scientist, Luther Burbank, came two grand plums—Gold and America. It was then plum growing received its greatest impetus. America is large, glossy, coral red, one of the most beautiful and delicious plums ever grown. In our orchard it is the one variety that can always be depended upon for a crop. Tree large, very vigorous, thoroughly hardy, bears extremely young, and bears enormous crops every year. Succeeds everywhere. Eating, cooking, market. $4.00 per bushel. Heads the list as usual. Best to the ground with large hand.

**SAPA.** A rich glossy dark purple skin variety, a very fine perfectly hardy new plum. Every home orchard should have some of these.

**OPATA.** A rich dark red oblong plum that is very delicious. Bears prolifically. Tree is tall upright growing. An excellent variety for home and market use.

**LEE’S BLUE.** Very rich in color and quality. Freestone. RIPENS the same time as the America. Be sure to try this one.

**DAMSON.** A medium sized dark purple variety which is very productive esteemed for preserving and good for eating out of hand. Ripens late August to early September.

GOLDEN (Gold). From twenty million native, hybrid and cross-bred seedlings, grown by himself, Luther Burbank made this his first choice. This was also his first great original; and though since he has produced many, many fruits, never has he produced one that can surpass or equal in all respects the Golden. Though a dwarf-like tree, with small slender limbs, this is one of the hardiest, strongest trees. The finest plums and one of the most beautiful, a light transparent golden yellow, almost covered with a lovely bloom. In nearly every state of the Union this plum has been tried and from them all come fine reports. This plum is at its best on dry, thin or clay soil. Leave it on the tree until it becomes highly colored and then it is delicious.

**SATSUMA or BLOOD.** Flesh firm, juicy dark red or blood color, well flavored and brought $4.00 per bushel. Good quality and firm, keeps well, a little. Unsurpassed in quality for canning. Tree very vigorous. One of the most valuable varieties of this section and adapted to the middle and northern states. Middle of July.

**SIX WEEKS.** One of the best productive plums grown; ripens early; of fine flavor; red in color; good to eat, fresh and fine for cooking or preserving best all around plum for the South.

**WILD GOOSE (Teek).** Medium to large; red with purplish black; skin bloom; flesh greenish-yellow, juicy, sweet and of good quality will hang on tree after ripening, splendid for drying and market. Tree very productive. September.

**WANETA.** Cross between Terry and a Japanese plum. Regarded as the largest and best all around summer fruit. Bright red, de-licious quality, small pit, skin free from acerbity, very productive and an early bearer, often producing fruit two inches in diameter. This is Prof. Hansen’s masterpiece in plums and you will make no mistake in planting them liberally.

**ITALIAN PRUNE**—(Europe). Medium large; purplish black; skin bloom; flesh greenish-yellow; juicy, sweet and of good quality will hang on tree after ripening, splendid for drying and market. Tree very productive. September.

**JAPANESE PERSIMMONS**

Some of these should be planted by every family. The fruit often measures ten inches in circumference. They ripen in August, September and October. The trees bear young, and are very ornamental.

Price: 75c each: $8.00 per dozen: $60 per 100.

**HACHIYA.** Very large, oblong, pointed, flesh yellow, skin red.

**HYAKUME.** Large, round; skin orange red; flesh brown or dark; very sweet.

BENTON COUNTY NURSERY CO., ROGERS, ARKANSAS.
Pears--Delicious Right from the Trees
Fine for Canning--Profitable for Commercial Growers

KEIFFER. Large, golden yellow, often blushed in the sun; juicy and melting. One of the best for preserving and canning; the most profitable to grow. Tree hardy, and vigorous. Keiffer receives more praise and condemnation than any other. It is liable to overbear; therefore special pains should be taken to thin the fruit.

PINEAPPLE or BLIGHT PROOF. This pear is very attractive; yellow with conspicuous brown specks, is very beautiful and has a distinct pleasing odor which has been suggested by some as resembling that of pineapple. For this reason the name "Pineapple Pear" has been adopted for it. The tree is a vigorous grower, has beautiful glossy foliage and is very prolific. Ripens last of August.

DOUGLAS. Blight proof; will bear fruit second year after planting; very productive. The fruit is larger than Keiffer or Bartlett. The color is golden yellow, often with pink shading. The flesh is white, very tender and juicy and excellent flavor.

FIGS

Figs should be planted more extensively. Do not let the sprouts or suckers grow, but prune the trees so as to have clean bodies at least two feet high. Cut tops back to six or twelve inches above the ground when planting. Such trees will bear fruit and will stand much colder weather than if the sprouts are allowed to grow.

2 to 3 feet..........................30c each; $5.00 per doz.
3 to 4 feet..........................40c each; $7.50 per doz.

BROWN TURKEY. July, August and September. Very large, bluish purple.

MAGNOLIA. July, August and September. Large pale green or white, shape varies from ordinary fig shape to very short or flat; always bears at one year old, and if grown will bear on the young wood the first year. In some sections it is called Neverfail.

CURRANTS

The currant is one of the most valuable of the small fruits. They mature just before Raspberries and can be used either raw or cooked. Being very hardy, they do not winter kill and are easy of cultivation, requiring little care. They can be grown in any good garden soil.

25c each; $2.50 per doz.

PERFECTION (Red). This truly wonderful new currant has both larger size and extra good quality. Perfectly healthy; a vigorous grower, and in fact an extra fine red currant in every way. Widely advertised all over the country.

WHITE GRAPE. Very large yellowish white. The finest of the white sorts. Very distinct from White Dutch, having a low spreading habit and dark green foliage. Very productive.

EARLY VARIETIES

BARTLETT. Large size, with beautiful bluish next to the sun; buttery; very juicy, and highly flavored; bears early. August and September.

WILDER EARLY. One of the very earliest pears. Size medium greenish yellow, with a brownish red cheek and numerous dots; flesh white, fine grained, melting, excellent. Always finds a ready sale in market. Largely grown by commercial orchardists. Tree bears good crops early and annually. August and September.

AUTUMN VARIETIES

FLEMISH BEAUTY. Large, beautiful, juicy, melting, rich and fine; good bearer; one of the hardiest and does well nearly everywhere. September and October.

GARBER. Very large, oval, narrowing at both ends; yellow as an orange; flesh whiteish, juicy, sweet and very pleasant. Tree an upright grower with heavy, dark green foliage. September.

Our Trees Bear Young

D. C. Smith and
Douglas Pear

June 10, 1939

Enclosed is a Kodak picture of me, and one of the small Douglas pear trees I bought from you and set out in December 1937. The picture was taken in August 1938 and shows your trees really do bear young. My Cherry trees also bore the first year.

I have bought trees from several other nurseries but the trees I get from you seem to grow faster and bear fruit quicker than trees from other nurseries. Are I think, to the fine root system they have and the splendid condition they are in when received.

Yours very truly,
D. C. Smith,
788 Aubert Ave.,
St. Louis, Missouri.

Hardy Trees, Plants and Vines from the Heart of the Ozarks
Berries for Home and Market

RASPBERRIES

Plant three and a half feet apart in rows seven feet apart. Thin to four or five good canes in a hill; cut out old canes as soon as through fruiting. 1800 plants set one acre.

3½c each; $2.50 per 100; $20.00 per 1000.
All varieties except Latham and Chief.

RED VARIETIES

FLAMING GIANT. The largest of all red Raspberries; a very rank grower, and will produce enormous crops of excellent quality berries.

ST. REGIS EVERBEARING. The new ever-bearing variety. It gives a crop of fruit all summer and autumn, training on the old canes in generous quantities until late in August. By this date berries begin to ripen on the young canes and continue until late autumn. Berries are a bright crimson of large size and of surpassing quality, sugary with full raspberry flavor. It succeeds upon all soils, whether light and sandy or cold, heavy clay and the canes are absolutely hardy.

Records Made With Red Raspberry
One acre St Regis produced 166 crates that sold for $30.00, and the same acre produced 75 crate in the fall that sold for more than $200.00, and sold by Austin Gino, Garfield, Arkansas.
Two acres of King Raspberry produced for George Eden, Garfield, Arkansas, $997.00 worth of marketable berries.

PURPLE VARIETIES

SODUS. An excellent home use berry, delicious for dessert, canning, preserves, jelly, etc. A very large, juicy fruit, a fruit that is easily grown and very hardy; adapted to cold and dry weather; does not have many briers, and yields very heavily.

BLACK VARIETIES

CUMBERLAND. The largest of all the black-cap; coal black berries; very firm and the quality of the very best; excellent shipper. Bush is a strong grower, stocky canes and unusually prolific. Mid-season.

PEARL. Prolong your Black Raspberry season and make money until the end. The NEW PEARL (late) is an extra large glossy appearing Black Raspberry of high quality. It is very rich in flavor and is a fancy table berry. The plants are strong growers and highly resistant to disease; also easy to grow.

NEW LOGAN BLACKCAP. The best dependable early Black Raspberry grown. In some localities where it has been grown for a few years it has almost displaced the other standard varieties. Berries are as large as the Cumberland, bears as heavily and ripens a week ahead of Cumberland. This gives the grower a chance to make some really good money. One of the New Logan's outstanding characteristics is its resistance to mosaic and other Raspberry diseases. We have a fine lot of thirty plants to offer.

GOOSEBERRIES

Gooseberries should be planted in good, rich soil and well manured once a year. Prune regularly, thoroughly cutting out all dead wood and surplus branches. Plant in rows 4 to 6 feet apart in row. It is well to mulch heavily in the fall. Plants are hardy, rugged and easily grown.

25c each; $2.50 per dozen.

OREGON CHAMPION GOOSEBERRY. Berries very large, brownish red color, very sweet and fine for table use and pies. Rush a strong grower, healthy, not very thorny and a prolific bearer. One of the best berries for the market.

MULBERRIES

CHIEF (The New Red Raspberry). Here is a wonderful Red Raspberry that is flowering ahead as fast as did its illustrious ancestors, Latham, and it has just as important a place to fill for it is ten days earlier than Latham, ripening at a time when Red Raspberries bring the most on all markets. Chief was originated at Minnesota State Fruit Breeding Farm and is a selection from 4000 seedlings of Latham. It is immensely productive, even surpassing Latham in that respect, the berries are of good size and excellent quality and the bushes are absolutely hardy and resistant to disease. We consider Chief the most outstanding Red Raspberry that has been produced in years; and believe these two, Chief and Latham, will make more money for fruit growers than any other two they can grow, combining as they do, a long fruiting season, extra heavy yield and fruit of such size and color and quality as to command top prices at all times. Our supply of Chief is quite limited.

Price: 5c each; 50c per dozen; $2.50 per 100; $25.00 for 1000.

STUBBS. Originated in Laurens County, Georgia. A tree of fine growth, beautiful foliage; fruit is of enormous size, frequently two inches in length; quality excellent. Lasts two months; extremely rare variety.

DOWNING. Fruit of rich, sub-acid flavor, lasts six weeks. Stands winter of western and middle states.

HICKS. Wonderfully prolific; fruit sweet; excellent for poultry and hogs. Fruit produced during four months.

Price: 2 to 3 feet..................25c each $2.50 per doz. 3 to 4 feet..........................35c each $3.50 per doz. 4 to 6 feet..........................45c each $4.50 per doz.

BENTON COUNTY NURSERY CO., ROGERS, ARKANSAS
BLACKBERRIES

BLACKBERRIES PAY BIG DIVIDENDS

There is a great and increasing demand for blackberries. There is no fruit capable of yielding greater profits. There will usually be from 150 to as high as 250 cases of 24 quarts from an acre, and that is usually considered from 15 to 20% above an average of $100 to $150 per acre after paying for picking, boxes and express.

For field culture plant three feet apart in rows six feet apart. For garden culture, plant four feet apart in rows five feet apart.

If planted between the rows of young trees in an orchard to maturity, they will produce fruit first season after planting.

35¢ each; 35¢ per dozen; $2.50 per 100; $20.00 per 1,000.

(Except Ozark Beauty and Everbearing)

Everbearing Blackberry

This new everbearing blackberry is one of the latest creations in blackberries. They bear enormous crops for three months, beginning to ripen just after the Early Harvest and continue almost until frost; the berry is very large, of fine quality, melting in your mouth and does not have the large core that is so common in so many kinds of blackberries. The canes are husky growing plants, standing erect, resembling small trees from 6 to 9 feet high and branch heavily. We have only a very few for the market this year. Price: 18c each; $1.00 per dozen; $7.50 per 100.

Ozark Beauty

Superior to any blackberry grown where it has become known, this blackberry is hardy, stands drought, it is free from seed and has no objectionable core. It has little or no juice, the pits being filled with thick syrup or flesh of the berry. Ripes just after Early Harvest. The berries are very large and best quality. You will make no mistake in ordering Ozark Beauty. Price: 18c each; $1.00 per dozen; $3.00 per 100; $25.00 per 1,000.

BLOWER BLACKBERRY. The giant of all blackberries. The fruit is exceedingly sweet. This is a first class shipper. The season of ripening is from the middle of July until frost, with the bulk of the crop maturing in the month of August. It is a hardy variety. It has endured 20 degrees below zero.

EARLY HARVEST. One of the earliest blackberries in cultivation, a compact dwarf grower, fruit rather small and of good quality, heavy bearers.

YOUNGBERRY

NEW BLACKBERRY

This new blackberry has the greatest success ever scored by any of the berry family. It not only bears very heavily but the fruit is easy to handle, it is very attractive, ships well, keeps well and cans well. It has so many commercial possibilities and it lies so well in the home garden that everybody should be interested in having a few vines or a commercial planting. The Youngberry is the result of the careful and patient efforts of Mr. Young in crossing the Loganberry and the Texas Dewberry. It has given the world its choicest bush berry with characteristics in size, appearance, flavor and general usefulness that has opened new possibilities in berry culture. Youngberries are universally liked and easily grown. They are among the largest berries; of dark wine color, have a minimum of seed, highly flavored and yield a rich looking cherry colored juice. In the home garden you will find that more fruit will be produced from a few Youngberries than any others that will grow on the same amount of ground. Youngberries thrive where any other berry fruits grow but do best in states of the same latitude as Ohio and South.

Price: 5c each; 50c per dozen; $3.00 per 100; $25.00 per 1,000.

BOYSENBERY

Boysenberry (Actual Size)

Said to be the largest and finest vine berry ever introduced. The Boysenberry is a new variety produced by crossing blackberries, raspberries, and Loganberries. The flavor is a very pleasing blend of these varieties. It has few and small seeds. The plant is very vigorous and hardy, coming through in good condition, without injury, in temperatures as low as 19 below zero. The berries are extremely large, many of the berries getting more than two inches long and over one inch in diameter.

Price: 16c each; 10 for $1.00; 100 for $6.00; 1,000 for $50.00. All prices are for strictly first class, well-rooted 1-year plants.

THORNLESS DEWBERRY

Perfectly free from thorns, berries are of very best quality, large in size, rich and juicy, and early.

Price: 5c each; 50c per dozen; $4.00 per 100.
Strawberries Have Them Fresh and Luscious from Your Own Garden

Early Senator Dunlap Strawberries

Price: 1c each; 60c per 100; $5.00 per 1,000. Except where otherwise noted.

**EARLY ST. LOUIS.** Profitable by reason of its productivity and earliness; requires deep, heavy soil, plant exceedingly vigorous and healthy; fruit large, handsome and good, rather long in shape and of a bright, glossy crimson; early.

**SENIOR DUNLAP.** This is a great producer and a money maker and a good all purpose variety. Easy to grow and thrilling for the beginner. Will grow a full crop on any kind of soil. Is considered one of the very best for canning and home use. Exceedingly productive, plants small but have long roots that make it a sure cropper and a drought resister. We have a wonderful productive strain of Dunlap that never fails to please.

**COOPER.** Large, light crimson, flesh of firm, good quality. Plants vigorous but should be planted in swamps or moist, clay soils. Perfect; late.

**AROMA.** An old standby that we have been growing for over thirty years. The demand for Aroma plants is tremendous, there is never enough to supply the demand. In matters of productivity, quality, flavor and market value, the Aroma is so much superior to the other old standard late varieties that we urge our customers to plant Aroma heavily and increase their profits by prolonging the berry season. Aroma does well wherever grown and no matter where you are located you can safely plant heavily to Aroma.

**KLONDIKE (Improved).** This is the standard berry for the southern and middle states and does fairly well in the northern states. Productive, brilliantly colored and so firm that on the northern market it classes as a re-shipper, that is, a berry firm enough to re-ship to the smaller tributary markets and therefore commands top-notch prices.

**BLAKEMORE.** The new strawberry that is creating a sensation among strawberry growers everywhere it has been grown. This berry originated under the U. S. Department of Agriculture and is a cross of Premier and Missionary. The berries are slightly blunted, conic with broad shoulders, slightly neck, much firmer than Premier or Klondike. Blakemore has proven considerably superior as a market variety. Berries are bright red color, tough skin, firm flesh, solid center, with excellent flavor; very productive, fine shipper and earlier than Klondike; blooms later and will escape frost when Klondikes are killed. 85c per 100; $5.50 per 1,000.

**MISSENYARY.** A very well established variety, leading the commercial sorts in central Florida. Earliness is its chief commercial asset, although the berries stand ship-ment well, and the plants are free from disease. Very vigorous, hard grower.

**DORSEY.** A sister variety to Fairfax. Excellence in Aroma berries are large, finest quality, very firm. Perfect flowering so can be planted alone. Strong grower, very productive. Price: 85c per 100; $5.50 per 1,000.

**PREMIER.** The Premier is one of the most popular varieties that we offer and it will deserves all the praise that can be given it. For several seasons 1. Premier is among the first to ripen. 2. Fruit large size and deep red color. 3. Firm flesh and excellent quality. 4. Heavy yielder and makes thrifty growth. 5. You can depend on Premier for a good crop when other varieties are a failure. 6. Foliation is not susceptible to the leaf spot which has ruined many strawberry patches. We unhesitatingly recommend the Premier for either home or commercial planting. Price: 85c per 100; $5.50 per 1,000.

**GUARANTEE**

On proper proof, we will replace free of charge any tree shrubs, etc., that prove untrue to label, or refund the amount paid. Because of the many factors over which we have no control, we cannot be responsible for the crop. Nor for any amount greater than the purchase price. All claims, except stock not true to name, must be made within thirty days after receipt of order.

**EVERBEARING VARIETIES**

*Price: 2c each; $1.50 per 100; $12.00 per 1,000*

**GEM.** The universal everbearing, an old favorite; succeeds in all soils and climates, except in the extreme south; fruits heavily the first season the plants are set; very heavy cropper of medium large, sweet mild, and beautifully colored berries. Grow it in hills or narrow rows.

**MASTODON. The Jumbo Everbearer.** From all indications and reports, Mastodon will hold first place among the everbearers. It’s a very beautiful and attractive plant, a heavy fruiter, and the berries are as large as strawberries grow. We have several years’ experience with the Mastodon and the more we see of it the better we like it, and we honestly believe you will like it. Anyway, we advise you to try some Mastodon plants this year. We want you to see a real heavy fruiter everbearer which without a doubt is the jumbo berries of very good quality. In order to get you interested we are making the price on Mastodon plants just as low as possible.

**“Strawberries the Finest I have Seen”**

April 6, 1939

Dear Sir:

This is to notify you that I have received the second order of strawberry plants and they were the finest I have seen in a long time. After placing the roots in water over night I had six blooms the following morning. I will do all I can to repay you for the courtesies you have shown me.

Thanking you again for your splendid service I am,

Yours very truly,

W. A. Hendrie
2830 Cleveland Ave., Columbus, Ohio.

**SAGE**

HOLT’S MAMMOTH. Plant very robust, perfectly hardy, ornamental. Large leaves, finest flavor, used for seasoning sauce, meat dressing, etc. Also for medical purposes. Should be in every garden. Price: 10c each; $1.00 per dozen.

Customer for Ten Years

January 31, 1939

Dear Sir:

I have been a customer of the Benton County Nursery Company for ten years and find that there are no others that can compare with them for good stock and price. During that time I have ordered from other nurseries but have been sorry.

I have ordered from one hundred to four hundred trees every year and in 1928 I bought three hundred trees. I am not boasting, but I am convinced that the trees I have been buying from your company have been the best I have ever owned. I am unhesitating in saying that I will continue to buy trees from Benton County Nursery Company whenever I desire to expand my nursery stock.

Yours very truly,

Mr. J. J. Johnson
Flint, Texas

BENTON COUNTY NURSERY CO., ROGERS, ARKANSAS
Novelty Fruits -- New and Different

Different from ordinary fruits and should be planted by everyone loving rare specimens. Plant in a small way only as Novelties and they will surprise and well repay you.

ARIZONA NATIVE FERSIMON. A very large seeding variety. Price: $1.25 each; $2.50 per dozen.

THE NEW BRAHMA BERRY. A new tremendously heavy yielding berry for the Central, Southern and Pacific Coast States. A trailing type much harder and better in all other respects than the Himalaya. It is very productive and has a high ratio of high quality berries which contain relatively smaller seeds than any other berry of this type. The Department of Agriculture has recommended it as a very worthwhile variety of both profit and personal satisfaction. Price: 75c each; $1.50 per dozen.

JAPANESE STRAWBERRY-RASPBERRY. The JAPANESE STRAWBERRY-RASPBERRY belongs to many of both stock and character. It is borne in large clusters and each berry is at first tightly enveloped by the large calyx, forming a sort of burr. For jelly making, canning and preserving it is without equal. Price: 15c each; $1.50 per dozen.

OZARK HUCKLEBERRY. This delicious little berry is a native of the Ozark Mountain range, remarkable for its fine flavor, is a choice fruit for jams, pies, and fruit cake. Grow luxuriantly, very hardy, a prolific bearer when young; because of its high amount of attention produces regular annual crops. Will grow on almost any kind of soil, and when once set is likely to perpetually never having to be renewed. Each 10c; $1.00 per dozen.

CRYSTAL WHITE BLACKBERRY. Strange as it may seem, this is really a pure Blackberry. Mixed with jet black ones for dessert, it makes a most wonderful dish. The fruit is about the same size as Snyder, with few seeds and quite sweet when fully ripe. The bushes are formed, strong growers and very productive. This is not a worthless novelty, but a fruit of real value, and should be in every garden. Price: 10c each; $1.00 per dozen.

IMPROVED DWARF JUNEBERRY. A good substitute for the large or Swamp Huckleberry. The fruit is borne in clusters, and is reddish-purple in color and changing to a bluish-black. In flavor it is a mild, rich subacid, excellent as a dessert fruit or canned. Price: 15c each; $1.50 per dozen.

PAW PAW or "ARKANSAS BANANA". A small fruit with purplish or whitish flowers and handsome foliage. The large fruit is edible and improves by cultivation. Hardy as far north as the middle of Nebraska. Worthy of more extensive planting. Very desirable as an ornamental tree. Price of first class trees: 50 cents each; $5.00 per dozen.

GOLDEN QUEEN RASPBERRY. A yellow Raspberry that is desirable both as a novelty and for the big, juicy fruit, is wonderfully productive and one of the finest for jams, jellies, etc., as well as dessert. Price: 10c each; $1.00 per dozen; $6.00 per 100.

ADAMS IMPROVED ELDERBERRY (Originated and introduced from the N. Y. Experiment Station). A new fruit perfected from the common elderberry. The small white flowers come in large, handsome clusters; very fragrant, handsome, opening in early summer when other flowers are scarce. Fruit black, very profuse; ripening in August. Grows 3 to 6 feet high. Berries are highly recommended for pies, sauce, cordials, and highly flavored wine which is very refreshing. Extremely hardy, likes these improved Eliders, they are easy to grow and do well everywhere. Price: 50c each; 3 for $1.00; 6 for $1.75.

HORSEURASIDH

ASPARAGUS

is of the easiest culture and is one of the first good things you may have from your garden. The plants, when purchased, will be at least one-year-old. The growth is rapid; each plant will multiply rapidly, and a large family for a lifetime, and it grows and multiplies very fast. 10c each; $1.00 per dozen.

Non-Warranty—In the event any Nursery Stock, Seeds or Plants sold by us should prove untrue to name, we will refund the price paid us or replace the same tree of charge, and it is agreed that we are not liable for any greater damages.

Our rule on paying the Parcel Post, Express or Freight Charges is on all orders amounting to $10.00 and up, except evergreens balled and burlapped, gives you advantage of having our high-grade nursery stock delivered to your door for the extreme low prices quoted in this catalog, by making your order amount to $10 or more. If you are thousands of miles away from us you have the same advantage of these very low prices as any living very near us.

RHUBARB

is one of the hardiest of perennials. It thrives in the coldest climate and will grow to a height of 6 or 8 feet in a season. It is easily grown and requires little care. It is of the greatest value for the kitchen garden and is used in the making of jams, preserves, jellies, pies, and as a potherb. It is easily raised from the root; plant it in early spring after a fair dressing of compost has been worked into the ground. Each plant will produce a large harvest of leaves in the summer. The leaves are rich in vitamins and are an excellent source of vitamins. It is a hardy, cold-hardy plant that can tolerate a wide range of soil conditions. It thrives in full sun and requires little care. Each plant will produce a large harvest of leaves in the summer. The leaves are rich in vitamins and are an excellent source of vitamins. It is a hardy, cold-hardy plant that can tolerate a wide range of soil conditions. It thrives in full sun and requires little care.

This deserves to be ranked among the best early vegetables of the garden. Scarcely has the grass begun to grow when your table can be supplied with this earliest of all vegetables. Excellent for sauce, pies, cakes, jellies, puddings, dressings, wine, etc. It continues productive the entire season, is valuable for canning for winter use. Succeeds everywhere. Easy to grow and should be in every garden or lot. It is productive, productive, productive, and productive, and productive. The price is low for your money than any other vegetable grown.

Culture—Good plants are easily grown in any good soil. Plant four feet apart each way, in deep, warm and very rich soil. The more moisture the better the stock. For winter storage take up two-year roots in fall, leave cut off and store either in cellars or under greenhouse bench in the dark.

GIANT VICTORIA. This is one of the greatest and most valuable vegetables we have ever offered. It is the earliest, tenderest, sweetest and best of all rhubarbs; fit for use in early spring, summer and fall. It is the chief. The common or sour sorts are fit for use only a few times in the spring. The Victoria is one of the last to be pulled out and new ones take their place. Scarcely has the frost disappeared until your table is supplied with this delicious, nourishing and healthful article of fruit which is so much desired and appreciated. The stalks are twice the size of the ordinary kind, and of a bright, crimson color, very tender, crisp, and of mild, delightful flavor; the skin in so tender it does not have to be removed when cooking and the sauce has a deep crimson color. Stalks will be large 16 to 24 inches long; broad, thick and solid; stalks will weigh on an average one-half pound each and often weigh a full pound. Enormously productive, brings high prices and is a great money maker and in demand. Try a dozen or two, our word for it, you will never have cause to regret your purchase and you will never be without some of this variety. Price: Strong roots, 10c each; $1.00 per dozen; $7.50 per 100.

LINNAEUS or MAMMOTH. Heavy one or two year seedling plants. 12 plants for $6.50; 50 plants for $25.50; 100 plants for $49.00.

Ripe Strawberries in 60 Days

Benton County Nursery Co., Rogers, Ark.

Gentlemen: This is to tell you how much I think of your nursery stock. In 1924, February, I ordered Concord grape vines, Mauston and Early Ivory and Early Wheeler Raspberries. In 60 days we had strawberries, in less than 6 months we had ripe grapes, in 16 months we had ripe peaches. The trees and vines are healthy and vigorous. In January, 1925, I placed another order of new and interesting varieties. Today I am sending you another order and two or three more orders with mine because they like the looks of my orchard. There is a big nursery joining my farm and they have good stock and deal with the public, but we get our nursery stock from Benton County Nursery Co., Rogers, Arkansas, because of the superior quality of their stock above any we know of.

Yours very truly, T. D. Warren, Rt. 2, Henderson, Texas.

Hardy Trees, Plants and Vines from the Heart of the Ozarks
CHOICE GRAPES  Big, Juice-Laden Varieties
Fine for Juice, Jellies, Jam, Eating

The grape is the easiest of all fruits to grow. The plants take little room, they thrive despite neglect and every year they produce their wealth of beautiful, health-giving fruit. With its roots in any cool, moist soil, you can lead it away in any direction to provide a grateful shade for porches, or for a restful seat, a border for a walk or climbing on the wall or house—East, West, North or South, on hill or in valley, on poor soil or rich, the grape grows, thrives, bears. It never disappoints. Plant a few vines or a large vineyard—make your own grape juice—jams, marmalade, jelly, and have plenty to eat fresh from your own vines.

2-year-old Vines...15c 15c 15c 15c

RED VARIETIES

DELAWARE. The bunches are small, compact, and sometimes shouldered; berries are small with thin but firm skin; flesh juicy, very sweet, and of a deep red color and of the best quality for both table use and for wine. Ripens with Concord or a little before; vine is hardy, productive and a moderate grower.

BRIGHTON. Bunch large, shouldered; berries medium to large, round, dark red, tender, very little pulp, sweet; juice, slightly aromatic and very good. Ripens early.

CATAWBA. Berries round and of good size; skin rather thick, pale red in shade, but a pretty deep red in sun, covered with a little bloom; flesh slightly pulpy, juicy, very sweet.

BLACK OR PURPLE VARIETIES

CAMPBELL'S EARLY. Great big, fine colored, juicy, black grapes, full of the richest sweetness. The seeds are very small and not readily from the flesh. A heavy annual bearer and should be included in every collection.

MOORE'S EARLY. The best early purplish black variety, ripening three weeks ahead of Concord. It has a most pleasing taste whether eaten fresh from the vine or made into grape juice.

WORDEN. A most meritorious Concord type variety that ripens about a week earlier than its parent, and is just a little larger.

CARMAN. Vines very thrifty, in fact, just as hardy as vines can be. The grapes are large and thick on the cluster. A cluster of these is solid red, with a hold. Bears from one to two bunches per vine and the best eating grape we have ever seen. If you have been planting grapes that would not sell, plant some Carmans. They outsell anything else on the market. The Concord grape begins to get ripe about August 10th and will hang on the vines after getting ripe, for several days.

CYNTHIANA. The best red wine grape known. We say the best because red wine grapes from this variety, grown at Bushburg, Mo., about 25 miles south of St. Louis on the Mississippi River, won first prize at the World's Exposition at Vienna, Austria, as the best red wine from all nations. This grape originated right here in Benton County, Arkansas. A very vigorous grower; making grape arbors is without an equal. For high, dry countries it appears to be at home. Needs a good soil, and the vine hangs on the small, fine roots. This also makes the vine heat-resistant. It does not require a rich soil, but prefers a dry soil of moderate fertility. It is so sweet it is almost too rich to eat out of hand. It has a higher content of sugar than any grape known. The berries are about the size of the Delaware while the clusters are large; color is black covered with blue bloom.

WHITE VARIETIES

POCKLINGTON. Seedling from the Concord. The vine is thoroughly hardy both in wood and foliage; it is a strong grower, never mildew in vine or foliage. The fruit is a light golden yellow, clear, juicy and sweet to the center, with little or no pulp; bunches very large, sometimes shouldered; berries round, very large and thickly set. Ripens with the Concord.

Our Four Best Grapes

Caco Grape—A Grand novelty
(Called by some the "Delicious")

This excellent grape is one of the most beautiful in color of any grapes grown. The color is a deep red wine color; the berries are large and bunches of good size; ripens a week or ten days before Concord, as a rule.

It is so rich in sugar that it has an excellent flavor for two weeks before it is ripe. The vine is a very strong, vigorous grower, healthy and prolific; the most productive of any grape grown in our experimental vineyards. It produces more bunches per acre than Concord and will sell for much more for a table grape; and for a wine grape it is claimed by some who know the value of grapes for wine, to be the very best grape grown for wine and champagne. Very few varieties of grapes grown in America will make good champagne, but Caco never cracks on the vines as many others do.

FREDOMIA. The new, very early Black grape. Earlier than Campbells or Moore's Early; originated at the New York Experiment Station; has been thoroughly tested in their vineyards where over 75 varieties are growing and has proven superior in every way to any other Early Black grape. It is ripening at the Arkansas Experiment Station along with many other varities where it appears to be the best of all early grapes. Flavor excellent, juicy, retaining its fine quality long; fruiting large, full, ripe, hangs on for weeks after fully ripe. Very large, compact clusters, covered with a heavy bloom, ripens at a steady rate; very productive and the earliest black grape grown.

PORTLAND GRAPE (New). This is a new white grape, originated at the New York Experiment Station, Fredonia, New York. The earliest of all grapes, which means high price on the market, with large bunches and also berries. Flesh sweet, juicy and of fine flavor and superior quality. The vine is very vigorous, hardy, easy to grow. The experiment station speaks very highly of it. Try this variety and we are sure you will not be disappointed.

EVERBEARING CYNTHIANA. This new Everbearing grape begins to ripen about the time the Concord does, and continues until frost. Has riped earlier than Concord, produces fine heavy clusters, and blooms on it all the time after they begin to get ripe and the bloom continues to end by frost. The grapes are same size and quality as the Cynthiana.

MUSCADINE CLASS

35c each; $3.50 per dozen

SCUPPENONG. Large, whitish yellow, good quality; bunches small, very productive and is one of the best wine grapes.

THOMAS. Muscadine type; color reddish purplish; excellent flavor; tender and sweet ripens in June.

Grapes Have Yielded Abundantly  July 6, 1933

Dear Sirs:

I have just received six Concord grape vines from you in the year 1923. These plants grew into very nice vines and have yielded abundantly. Although the season is very short here these plants have produced enough grapes for family use. These grapes are of the highest quality.

Yours truly,

Mrs. Martha Parks,
419 S. Florence St.,
Stuttgart, Arkansas

BENTON COUNTY NURSERY CO., ROGERS, ARKANSAS
Everybody likes Grapes! But in the popular mind there still exists the impression that three years must elapse between the planting the vines and picking grapes from them. This period between planting and harvesting grapes can be cut down to one year, by planting carefully grown “BEARING SIZE VINES.”

**CONCORD**  
**THE KING OF GRAPES**

This variety grows and bears well on any kind of soil, high or low lands, stony or smooth lands, sandy or gumbo lands. It is the most widely known and most popular of grapes.

Bunches are large and compact, berries are large round and almost black covered with blue blooms. Skin is thin, flesh sweet, pulpy and tender, quality good, very prolific and a good grower. Concord begins to get ripe about July 25 and continues for about three weeks.

---

This is the leading variety that is making the grape growers rich. It is grown extensively in Arkansas and Missouri for table grapes; is grown in Iowa, Michigan and New York extensively and sold to grape juice factories.

You will not make a mistake in planting largely of this variety; vines do well on arbors, walk shades, back yard fences, etc. Planted 6 to 8 feet apart, around your home, in back yard, etc., a few vines are valuable for quick and everlasting shade and for a perpetual source of fine grapes.

Some vineyards are producing more than $150 worth per acre before they are out three years. In many instances the first crop will yield enough fruit to pay for the land they are growing on, for the vines and for all the cultivation and hoeing that has been done on the vineyard.

Grape vines are said to be longer lived than apple trees. It is claimed from good authority that grape vines will grow and produce valuable crops from 50 to 75 years.

They bear full crops when other fruits fail, when long droughts cause a failure in grain and cotton crops. In fact, they are the most dependable for paying crop of anything in the agricultural line.

The larger part of the vineyards planted and being planted are being set 8 feet in the rows and making the rows 10 feet wide, requiring 450 vines to plant an acre. Vines begin to bear within one year after planting them. The two year vines often bear fruit in the nursery rows.

**WHY YOU SHOULD PLANT “BEARING SIZE” GRAPE VINES**

You can realize your desire to have grapes from your own vines, a lot of them next year, and a few this year, too, by planting “BEARING SIZE” Grape Vines.

“Bearing Size” Grape Vines are simply selected vines that are properly cultivated, sprayed and pruned for two years. They would bear their first crop this fall if left where they are.

They are grown especially for gardeners who want vines that will bear in as short a time after planting as practical.

“Bearing Size” Grape Vines have vigorous canes, and a heavy mass of roots to correspond. They are dug, handled and packed with extreme care so as to save all the roots, preserve the canes without injury, and get the vines into your hands in perfect condition to plant.

If carefully planted, spreading the roots naturally in moist, rich soil, and cutting the canes back about one-half they will bear some grapes the same season planted, and produce nearly a full crop the next.

---

**AND THEY ARE GRAPE VINES OF SUPERIOR QUALITY**

These “Bearing Size” Grape Vines are produced by planting cuttings taken from vineyards that are famed for their production of quality grapes. The cuttings are set in our planting grounds here in the Mountains. In this fertile soil, with its bracing atmosphere and long growing seasons, and with the best of care and cultivation, these develop into extremely hardy, vigorous stock that makes rapid growth and produces wonderful crops of grapes, wherever planted.

Order at least a few vines of each variety described in this catalog. This will give you an assortment of red, white, blue and black, as well as early, midseason and late. A vineyard that will prove a source of pride, pleasure and profit to you as long as you live.

---

**“BEARING SIZE” GRAPE VINES ARE NOT EXPENSIVE**

As they are shipped direct to you from the packing house at the Nursery where they are grown, the cost of “Bearing Size” Grape Vines is not high.

---

Pick Grapes If You Plant Bearing Size Grape Vines

Hardy Trees, Plants and Vines from the Heart of the Ozarks
Paper Shell Pecans

The pecan is fast becoming the most popular of all nut bearing trees. A first class pecan tree one year old from graft, 3 to 4 feet, on roots 3 to 4 years old when carefully planted, fertilized and cultivated, will begin bearing from 4 to 6 years. Pecans succeed on many kinds of soil, especially on rich bottom or basin soils that are dry.

They can be successfully grown on hills and hillside and many other places around homes and barnyards where no other trees can be profitably grown. In planting trees for shade I would suggest the pecan; since they make an attractive shade and are at the same time the most profitable of all trees.

JAPAN WALNUT

2 to 4 feet | $0.80 per doz.
Fast growing tree; a beauty for ornamental; perfectly hardy and valuable for its delicious nuts.

BLACK WALNUTS

2 to 4 feet | $0.80 each
Selected from good strain of large nuts, and fine kernels. Trees are fast growing and good for shade trees as well as the nuts.

successful. Planting should be made in early spring when the soil is warm and moist.

STUART. Very large, oblong, marked with dark color, shell medium thickness, flavor rich and sweet; nuts averaging 40 to 60 per pound. One of the earliest and heaviest bearers. No one can make a mistake in planting largely of this variety as it succeeds on the different soils, especially on the clay soils of the northern portion of the cotton belt.

SUCCESS. Large large, oblong, tapering to the apex. Color reddish brown, purplish markings, shell thin, cracking quality good; partitions thin; kernel large, full, plump, yellow; flavor sweet, quality very good. The tree is a good grower. A fine variety.

The two varieties named are considered the best of all pecans. They have been recommended by the United States Department of Agriculture as being immune to scab and other diseases to which most varieties are susceptible.

English Walnut

2 to 3 feet | $1.00 each; $10.00 per doz.
3 to 5 feet | $1.50 each; $15.00 per doz.

JAPAN WALNUT

2 to 4 feet | $0.80 per doz.
Fast growing tree; a beauty for ornamental; perfectly hardy and valuable for its delicious nuts.

BUTTER NUT (or White Walnut)

2 to 4 feet | $8.00 per doz.
The nuts are large, long, oily and nutritious. Trees are lofty and spreading with a tropical appearance.

AMMONDS

2 to 4 feet | $5.00 per doz.
Soft shell, rich and deliciously flavored, rapid growing trees and bear very young.

FILBERTS (or Hazelnuts)

2 to 4 feet | $7.50 each
Good quality and bear almost every year and very young.

NOTICE: All stock is guaranteed to be true to name, up to grade and free from disease and insects. If found to be otherwise, we will, upon proper proof, refund the amount paid for the stock or replace the stock in question free of charge. This is a mutual agreement between buyer and seller that we are not liable for any greater amount than was paid for the stock. All shipments will be accompanied by a certificate of nursery inspection.

CARE AFTER TRANSPLANTING

PRUNING TREES AND SHRUBS. After trimming back and pruning the limbs of ornamental trees, when planting, they need only enough trimming to shape them properly. Low side limbs should be removed to raise the head where the top was, or they may be gradually removed until the head is at the desired height. Shrubs need pruning in the fall before the ground is frozen; the cutting out of older wood occasionally to keep them in proper form. The general rule is to trim fall blooming shrubs, like hydrangeas, in the spring, and spring blooming shrubs, like spireas, in the early summer directly after they have bloomed.

CULTIVATION. Frequent shallow cultivation will protect the soil and help prevent blowing and washing. It improves the chemical and physical condition of the soil by adding humus.

MULTING. For only a few trees, shrubs, etc., a mulch of such materials as grass clippings, old strawy manure, marsh hay or dead leaves may be used instead of a dust mulch.

WATERING. Artificial watering, as an emergency measure in case of drought is highly desirable. In any case water thoroughly. Do not sprinkle. Give the plant all the water it will take at one time. No more water need be applied for several days when this is done.

FERTILIZING. A good barnyard manure is the best fertilizer. When needed, a good application of manure applied around the orchard tree under the branch drip will be very beneficial.

Small fruits of all kinds should be well fertilized every year. Manure particularly during the growth when plowing but not after plants are set.

If your order calls for any varieties we do not have we will send nearest to the variety asked for that we possibly can, and will do our best to send something as good or better for your locality; unless you tell us not to substitute.

Our guarantee: All stock is guaranteed to be true to name, up to grade and free from disease and insects. If found to be otherwise, we will, upon proper proof, refund the amount paid for the stock or replace the stock in question free of charge.

Raspberries Brought 50c Per Box
February 10, 1930

Dear Sir:

For prompt and best varieties yours is the best. The trees bear earlier, yield heavier and live longer than any trees I have ever tried. They are the best trees that can be bought for so little money.

I have been getting your nursery stock for ten years now and it is true to name and is reliable. The fruit is as large as your catalog says it will be, too.

My Raspberries yielded well, and they brought $20 a box.

Yours truly,

J. P. Kimberly,
La Russell, Missouri
Climbing Vines That Cling and Twine
With an Artistic Beauty . . . Many Are Fragrant, Too

AMELOPSIS Veitchi (Boston Ivy). This is one of the finest hardy climbers we have for covering walls, as it clings firmly to the smooth surface, covering closely with overlapping foliage, giving appearance ofingles. The color is a fresh deep green in summer, changing to the brightest shades of crimson and yellow in autumn. 2 year, 40c each.

Quinquenolia (American Ivy). Virginia Creeper. This vine climbs on trees, rocks, trees, walls, etc., 2 year, 40c each.

Aristolochia (Sipho (Dutchman’s Pipe). Although the brownish pipe-shaped flowers are interesting, the immense heart-shaped leaves are the important feature, furnishing as they do the most complete screening leafage of any cultivated vines. 2 year, 40c each.

Bignonia Radicans (Trumpet Flower). A robust woody vine, twining tightly with numerous roots along stems. Its orange scarlet, trumpet-shaped flowers cluster on the tip of branches. Leaves light green, climb to great heights on trunks of trees, and for every purpose is one of the best vines. 2 year, 40c each.

Celastrus Scandens (Bitter Sweet). Handsome, glossy foliage and large clusters of beautiful, orange crimson fruits retained all winter. Its graceful sprays of berries make charming winter house decorations. 2 year, 35c each.

Bignonia Radicans

EUONYMUS (Radicans). One of the finest evergreen vines with small, rich green foliage and pink flowers. For covering rocky banks, rough walls, tree trunks, etc., also for vines, baskets and border of beds. 18 to 24 inches, 25c each.

KUDZU VINE. Large foliage and dense shade, growing 50 feet in one season. Flowers plentiful in August, rose purple; pea-shaped; in small racemes. A truly remarkable, handsome, and serviceable porch vine wherever it is hardy enough to withstand the cold winters. Not reliably safe north of the Ohio River. 1 year, 25c each.

Lonicera (Honeysuckle). Their vining qualities are excellent, but the delightful fragrance of their flowers makes their strongsuit for favor.

Aurea Reticulata (Golden Leaved Honeysuckle). Flowers yellow and fragrant. 50c each.

Halleon (Hall’s Japanese Honeysuckle). Color, an intermingling of white and yellow; extremely fragrant and most satisfactory. Gets along fairly well in partial shade and is used extensively as a ground cover. 25c each.

Sempervivens (Scarlet Trumpet Hiski). Trumpet shaped flowers of bright scarlet. 50c each.

WISTERIA. One of the handsomest subjects for use on pergolas, porches and trellises, with attractive foliage and magnificient dense cropping clusters of pea shaped flowers crowning the top.

Sinensis. Blue. Panicles about 12 inches long. 40c each.

Alba. White. 40c each.

Magnifica. Lavender purple. 50c each.

Privet Hedge Plants

AMUR RIVER PRIVET (North). A very hardy northern type, vigorously upright and tall growing. The leaves are dark green and somewhat laurelous; tardily deciduous makes a strong, bold hedge and quite conspicuous bloom in erect white panicles.

Privet Hedge

AMUR PRIVET (South) (L. Amurensis). Fine leaf type. Fine large shrub for specimen or screen planting, the horizontal, feathery, fern-like method of branching being exceedingly beautiful. Foliage is light green, small leaves, practically evergreen in this country. Groups of 3 to 5 in backgrounds give very pleasing effect. Economical, quick growing, height of 20 feet in remarkably short time.

For sheared hedges, Amur River is by far the best and most practical for the South. We can suggest and supply many other varieties for special kinds of hedges such as informal and flowering. Plants should be placed in loose, very rich soil at intervals of 10 to 12 inches. To give more density to the hedge, plant in two rows 15 inches apart, staggering from one row to the other. Cut plants back to within 6 or 8 inches of the ground, so that they will branch out thick at the bottom; shear hedge often.

PRIVET, California (Ligustrum ovalifolium). Of upright growth, rapid. Foliage of lighter green than the Amur. Most popular for hedging purposes, as well as single specimen plants. Holds its foliage through to spring in mild winters, but a severe freeze will cause its leaves to drop.

PRIVET, Ibolium. With leaves larger than in California, perfectly hardy.

BENTON COUNTY NURSERY CO., ROGERS, ARKANSAS
Build and Enjoy a Rock Garden

AN ENTHUSIAVING PERSONAL HOBBY

Nature actually started this fascinating gardening phase, for modern gardeners, both professional and amateur, are developing the subject with much enthusiasm, ingenuity and delightful effect. "Rock Gardens" may embrace acres of land broken up naturally in ridges, hummocks, valleys, pools and waterfalls, with overhanging stones and picturesque existing trees. These natural settings in the right place are, unfortunately, rare; consequently we have to create such effects by artifice.

See Hardy Perennials, page 21.

CONSTRUCTION

Location must, of course, be what have you. Liberal Use is much preferable; good drainage is essential. If your land is flat, dig a valley and build a mound. If there is an uneven corner spot, take advantage of it.

Get together the best stones you can find; some uneven boulders, more of uneven, irregular shaped pieces. Uniformity in size and shape should be avoided. Go easy on both very large stones and massive boulders. No bricks or concrete fragments.

Soil is important. Mix a good porous garden loam with equal portions of both sharp, gritty sand and vegetable fiber—which may be leaf-mold, or decayed woodstuffs, or Michigan pond soil.

Distribute this soil on your bank construction, first; then crown in and solidify anchor the stones, naturally commencing at the outer base, and working up a gradual slope towards the crest. In order to catch rainfall, dew or applied moisture and direct it to waterfalls, downward without loss into the thirsty soil, tile the outer edges of stones upward at least 10 degrees. In building rock wall, care should be taken to insert vertical face but a graduated slope in successive tiers, its stones uplifted as above for the same reason. Wherever convenient, pack in the roots of plants designed to creep across and trail over the stones, as you go along.

In apportioning relative stone and dirt areas, always sunshine is much preferable. A soil-pile to be screened but a garden in which the occurring stones are merely helpful, picture-like.

Tufted plants will resent foliage and moderate upstanding flower stalks, are best suited to this use. The creeping, trailing types spread densely over the flat surfaces, eventually creeping downward over the edges in moosy trails of varied hue. In exterior supplanting groups, in occasional clumps of flowers. This is not all, and prominently massed along the crest, there are many thorny, colorful and dependable types, which, with a little care, and with less restricted space and more emphasis on topographical features, welcome the enrichment of such units as Cotoneaster, Honeysuckle, various Weigela, Yews, Salix and Phlox, and an occasional accent at balanced locations achieved by the slender, upright Junipers and Arbor-vitae.

The usual summer watering at some of planting must be vigilantly repeated until you are sure Nature is providing ample moisture.

An Attractive Rock Garden

Hardy Trees, Plants and Vines from the Heart of the Ozarks
Modern One-Acre Home Fruit Orchard

Since acreage is being cut in your cash crops to keep away from overproduction, let’s put one acre of this idle land in orchard that will produce all the fruits, berries, grapes, rhubarb, asparagus, etc., that one family will consume in their home. Just think for one moment what it would be worth each year to have all the fine fresh, ripe fruits of all the different kinds included in this MODERN HOME ORCHARD.

It means fully one-half of the crops you buy your foods saved to you, and you know the better your health and if each family will have all they can use and use it in the many ways it should be used, it will almost keep your table supplied with food of the most wholesome sorts. Besides having the pleasure of enjoying all this rich, luscious, ripe fruit you want, it saves you many dollars, for your table must be supplied with good things to eat and by growing this you are having the best to be had for the least possible cost.

This MODERN HOME ORCHARD comes in good trees (3 to 5 ft.) and the largest size (2-year bearing size) grape vines and plants of all kinds are of the best size, so that you will have much of this assortment into bearing within a few months after it is planted in your orchard, and the second year most all of it will be into bearing and will bear each year continuously thereafter. The list of varieties we have selected for this Modern Orchard are of the best sorts to be had, regardless of prices paid for them. They are varieties that we know to be of best quality and to come into bearing at an early age, and this selection cannot be beat for real good qualities and most productive varieties.

Now, since this MODERN HOME ORCHARD is going to supply orchard fruits foods for your table, you must make up your mind to give it an ideal location, on as good land as you have and if it is not real good soil you must make it so by applications of brannyard manure (no danger of getting it too rich), for the better your soil is, the finer your trees, plants and vines will be and the larger your fruits will be. If the location where you would like to have this orchard is not already good orchard land you can soon make it good by applications of barnyard manure. Be sure that your location is well drained, that water does not at any time stand over or near the top of the soil for several days in succession. After you have this location on good soil make up your mind again to give this lot of trees, plants, and vines the very best of care and attention same as you do your garden when you plant it in the spring. See that this HOME ORCHARD gets as good attention as any spot on your place and we will guarantee that it will pay more for this special attention than anything you can grow and this one acre will produce more, in what it would cost you in cash to buy, than any other four or five acres you can grow of any other crops.

TELL YOUR NEIGHBOR, WHO DOES NOT HAVE AN ORCHARD, ABOUT THIS OFFER, and confer a favor on both of us.

For this ONE ACRE HOME ORCHARD we have selected the following kinds and numbers of fruits, and of the larger size trees and plants, we will ship to you this lot, which would cost at our catalog prices over Fifty Dollars.

26 APPLES, 3 to 5 ft.—2 Early Red Bird, 2 Maiden Blush, 5 Blood Red Delicious, 5 Yellow Delicious, 2 Red June, 2 Ada Red, 4 Jonathan, 4 Stayman Winesap.
26 PEACHES, 3 to 5 ft.—2 Stinson’s October, 3 Arkansas Black, 4 Early Elberta, 4 Belle of Georgia, 2 White English, 2 Early Wheeler, 3 Altos, 4 J. H. Hale, 2 Red Indian.
26 PLUMS, 3 to 5 ft.—2 Early Gold, 2 Italian Prune, 2 America, 2 Hanka.
12 CIERRIES, 3 to 5 ft.—6 Large Montmorency, 3 Early Richmond, 3 English Morello.
6 PEARS, (Blight-Proof), 3 to 5 ft.—3 Douglass, 3 Pineapple.
2 QUINCE, 3 to 5 ft.—1 Champion, 1 Orange.
12 GOOSEBERRIES—3 Oregon Champion, 6 Houghton, 3 Downing.
209 BLACKBERRIES—100 Osark Beauty, 100 Fancy Harvest.
200 RASPBERRIES—100 St. Regis, 100 Latham.
150 DEWBERRIES—50 Lucretia, 50 Austin, 50 Primo.
250 STRAWBERRIES—100 Blakemore, 100 Premier, 25 Early St. Louis, 25 Cooper.
25 YOUNGBERRIES.
6 JUNEBERRIES.
18 RHUBARB (Pie Plant)—18 Giant Victoria.
5 HORSERADISH.
30 CURRANTS—12 Concord, 6 Moore’s Early, 4 Caco, 4 Niagara, 4 Delaware.

In order to help the people on the farms who have been so hard hit for the last few years, we are offering this entire lot, delivered to your nearest express office for—

ONLY $32.00. By Prepaid Express

DAHLIAS

DECORATIVE VARIETIES

Mixed varieties of many colors and good sorts, 5c each; 50c per dozen.

DAHLIAS. In this lot we can supply the color wanted, of white, yellow, pink, and dark red, at real good kinds for 10c each; $1.00 per dozen; $7.50 per 100.

FANCY DAHLIAS

25c each; $2.50 per dozen

Jersey Beauty. Flowers are perfect Eoons Pink. Stems and plants are very hardy and strong and are immune from defects.
Jane Dow. Flowers are glistening bronzy buff and salmon shade. Dark green leatherlike foliage, stems are long and very sturdy.
Mrs. Ida De Ver Werner. Large flowers of clear blue-rose on strong stems, an easy grower and plants tall.
Margaret Woodrow Wilson. Large creamy white, suffused pink, dark reflex on petals. Blooms freely.
Judge Marcus. Flowers are beautiful combination of salmon red, orange and apricot; very prolific, stiff wiry stems.
Fort Mouton (Cactus Type). Giant rich crimson or maroon-twisted petals. Stiff stems on tall vigorous bush.
The Commodore. Large clear canary yellow Prolific bloomer. Does well in any soil.
Jersey Beauty. Bright hybrid with petals twisted to show reverse of lighter shade, two-tone effect, large and massive.
Sagamore. Blooms are finest semigold Bush is sturdy, fine stems, excellent commercial variety.
Pride of Stratford. A big flowering ball of color with all the beautiful hues, and streaks of orange, red and yellow you can imagine.

A. D. Livon (Ball shaped)—A beautiful soft pink flower, quilled petals.
Maud Adams (Ball shaped). A pure snowy white, very effectively overlaid clear deli- ciate pink.
Yellow Duke (Ball Shaped). A splendid primrose-yellow of good form and strong stems.

Jersey Beauty

18 Bushes of Fruit from 10 Trees the Second Year

February 6, 1939

Dear Sir:

We ordered about sixteen trees from you and put them out in January, 1938.

In 1938 we gathered three buckets of Plums, four buckets of Red Bell Peaches, eight buckets of Early Elberta Peaches, and three buckets of Krummel October Peaches. They were large, fine peaches and were of such good flavor.

I am a Benton County Nursery booster, and in a moment or your Annour Fruit Collection today.

Yours very truly,

Mrs. Kate V. White,
R. No. 1, Box 83,
Durant, Oklahoma.
PERENNIAL PLANTS

BLEEDING HEARTS. 35c each; $2.50 per dozen.

CHRYSANTHEMUMS. A good assortment of colors of the very best outdoor, hardy kinds. 15c each; $1.00 per dozen.

CHRYSANTHEMUM KOREAN—2 to 2½ ft. Single flowers in lovely pastel colors, appearing in the fall. 20c each.

Princess Elizabeth. 2 ft. Beautiful pink. Wm. Copeland. 2 ft. Sweet lavender. Englecombe Yellow. 2 ft. Beautiful yellow.

NARCISSUS. 5c each; 50c per dozen; $2.00 per 100.

PEONIES. Mixed varieties. All are good kinds. 25c each; $2.50 per dozen.

PEONIES. Named varieties. 35c each; $3.50 per dozen.

The varieties named below are very large, double and fragrant.

**LILIES**

DAY LILY. Blooming size. 10c each; $1.00 per dozen.

REGAL LILY. Blooming size. 45c each; $4.00 per dozen.

MADONNA LILY. Blooming size. 25c each; $2.50 per dozen.

LILY OF THE VALLEY. Blooming size. 5c each; 50c per dozen.

LEMON LILY. Blooming size. 15c each; $1.50 per dozen.

TIGER LILY. Blooming size. 25c each; $2.50 per dozen.

RED RUSSIAN LILY. Reddish-orange with 6 to 10 petals in clusters on one stem. Just a mass of blooms in early June. Plant 8 in. deep. 25c each; $2.50 per dozen.

PHILIPPINE LILY. A new beautiful variety. The slender stem is covered with the same grassy foliage as the Regal Lily. Flowers are king, white trumpet-like shapes with a beautiful pale emerald-green throat. They commence blooming in August and flower until stopped by frost. Very easily grown. Price: 45c each; $4.00 per dozen.
GLADIOLUS for Late Summer Blooms

GLADIOLUS

Mixed varieties of good sorts and many colors. Each 2c; 20c per dozen; 100 for $1.50.

Alice Tiplady. Orange-saffron blossoms; strong spike. 5c each; 50c per dozen.

Catherine Coleman. Clear salmon-rose; 7-8 large flowers, open, tall, strong plant. Extra good. 5c each; 50c per dozen.

Dr. Moody. Early, light lavender. Produces several flowers from one corm. 8c each; 80c per dozen.

Dr. Nelson Shook. Ruffled tyrian rose. Late blooms; very showy; tall, heavy spike. 6c each; 60c per dozen.

Geraldine Farr. True lavender with darker stipplings in throat, larger bloom. 8c each; 50c per dozen.

Golden Dream. The largest and best of all yellows, very clear, deep yellow. Tall, strong stems. 5c each; 50c per dozen.

Highland Laddie. Large pink blossoms, strong stems. 5c each; 50c per dozen.

Jack London. Light salmon with red markings and yellow throat. 5c each; 50c per dozen.

Los Angeles. Brilliant clear shrimp-pink of large size and produces several flower stems from one corm. Vignorous grower. 6c each; 60c per dozen.

Mrs. F. C. Peters. Large, late flowers of orchid-pink; very outstanding variety. One of the best commercial lavenders. 5c each; 50c per dozen.

Mrs. Leon Douglas. Salmon-rose; striped flame, very tall with very large flowers, very showy, good exhibition. 5c each; 50c per dozen.

Mormora. New variety of gray lavender; dark blotch on petals. Sometimes called a smoky lavender. Good exhibition. 10c each. $1.00 per dozen.

Nancy Hawks. Apricot, shaded with orange-pink; blossoms large with several open at same time. Becoming very popular. 5c each; 50c per dozen.

Pilzer's Triumph. Bright orange salmon-red with red blotch. Immense wide open flowers. Best results cut as bud begins to open. 5c each; 50c per dozen.

Richard Diener. Brilliant geranium pink; strong stems. One of the best. 5c each; 50c per dozen.

Tiffany. Large, pure white blossoms. Very fine. 5c each; 50c per dozen.

White Giant. Large, clear white blossoms. 5c each; 50c per dozen.

W. H. Phipps. LaFrance pink, overlaid with light, rose-salmon, which is lighter toward the center and has ruby speckled throat markings. More flowers open at one time on this variety than any other we know about. A wonderful Glad. Popular everywhere. 5c each; 50c per dozen.

1910 Rose. Large, flowering rose-pink. 5c each; 50c per dozen.

Flaming Sword. A very popular splendid, clear red. One of the earliest. Strong stems. Large blossoms. 6c each; 60c per dozen.

Picardy. A most excellent variety with large, clear flesh pink florets, which shade to shrimp-pink at edges of petals. Many-flowered spikes. 5c each; 50c per dozen.

OTHER BULBS

TUBEROSE. The very fragrant flower. 5c each; 50c per dozen.

CALADIUM (Elephant Ear). The large type; leaves grow to be 6 feet in diameter. Medium size bulbs. 15c each; $1.50 per dozen. Large size bulbs, 25c each; $2.50 per dozen.

BENTON COUNTY NURSERY CO. ROGERS, ARKANSAS
for Shade, Beauty and Flowers

BOX ELDER (Acer Negundo). A large, rapid growing native tree of spreading habit, belonging to the Maple family. Prices: 4 to 6 ft., 50c; 6 to 8 ft., 75c; 8 to 10 ft., $1.00.

CATHALPA BUNGEE. A remarkable species forming a dense, round umbel-like head; makes a beautiful lawn tree when planted with white budded on a high stem. 4 to 5 ft., $1.00; 5 to 6 ft., $1.50; 6 to 7 ft., $1.75.

CATHALPA SPECIOSA. Broad, deep, green foliage, with large, fragrant trumpet flowers in clusters in the spring. The Catalpa is a native of most parts of the South and is valued for its durable timber and for ornamental purposes. 4 to 6 ft., 30c; 6 to 8 ft., 50c; 8 to 10 ft., 75c.

COTTONWOOD (Populus Deltoides Canaden- sis). A native of the Mideast, forming a fine tree for windbreaks. Large and spreading and used where the effects of the Poplars are desired. Does exceptionally well in the plains country. 4 to 6 ft., 30c; 6 to 8 ft., 50c; 8 to 10 ft., 75c.

CHESTNUT, HORSE. A large tree of regular outline, 60 to 80 feet tall, completely covered in May with bright upright spikes of white flowers. Satisfactory either as a street or lawn tree, particularly desirable where dense shade is required. Prices: 3 to 4 ft., $1.00; 4 to 5 ft., $1.25.

Beichels Double Flowering Crab Apple

CRAB APPLE. Beichels Double Flowering. A handsome bush or little tree seldom over 20 feet in height. One of the finest for lawn decoration. Produces in perfection double, delicate pink flowers resembling at a distance dainty little roses. Blooms when young and is very fragrant. 3 to 6 ft., 75c; 3 to 9 ft., $1.00.

DOGWOOD, RED FLOWERING (Cornus Florida Rubra). Similar to White Flowering Dogwood except that the flowers vary from pink to light red. Grows 10 to 20 feet high. Prices: 2 to 3 ft., $2.00 each.

DOGWOOD, WHITE FLOWERING (Cornus Florida). A slow growing dwarf tree with abundant, large, white flowers appearing very early in the spring before the grayish-green leaves, and followed by attractive red buds. Grows 10 to 20 feet high. Prices: 2 to 4 ft., 50c to 4 to 6 ft., 75c each.

ELM, AMERICAN. In our opinion the hand- somest and most desirable of all the native trees. Probably more largely planted and better known than any other. A tall growing straitly tree, reaching 60 feet, with a wide arching top and vase-like form. Extensively used for street planting where its wide- spreading branches form perfect Gothic arches over the streets. Prices: 5 to 6 ft., 50c; 6 to 8 ft., 75c; 8 to 10 ft., $1.00 each.

ELM, CHINESE. A native of China; a noble, rapid growing tree, forming a very dense, smaller leaves than the American Elm. Leaves stay on the tree much longer in the autumn; the branches project from the trunk almost at right angles. A real beautiful shade tree for lawns and street plantings. Prices: 4 to 6 ft., 50c each; 6 to 8 ft., 75c; 8 to 10 ft., $1.00.

HAWTHORNE. This charming little tree often attains a height of 20 feet and is a power of beauty when in bloom; it is equally ornamental when loaded with its crimson fruits that hang on until late in the winter; grows on great variety of soils and is perfectly hardy. 4 to 6 ft., $1.50 each.

JUDAS TREE (Cercis Canadensis) (Redbud). A small growing tree of irregular form, with heart shaped leaves. It is covered with delicate pink blossoms early in spring before the leaves appear. A charming association among the tender greens and bronzes of young foliage. 3 to 4 ft., 75c; $1.25 per 10; 4 to 5 ft., 50c; $1.00 per 10.

LARCH (European). Tall, slender trees of light, feathery foliage, resembles the foliage of an evergreen (Spruce or Fir). It is very hardy and grows rapidly and is a real beauty. 3 to 4 ft., $2.00 each.

LINDEN, AMERICAN (Basswood). A tall growing, straitly tree, growing 60 to 80 feet tall, with large shining green leaves and light yellow fragrant flowers in July. A splendid tree for lawns and street planting. Valuable for its beautiful white wood. Prices: 5 to 6 ft., $1.50 each; 6 to 8 ft., $2.00 each; 8 to 10 ft., $2.50 each.

LOCUST, Black (Robinia Pseudacacia). Popular for both shade and avenue trees, as well as for windbreaks and timber belts, white sweet-scented flowers in spring. 4 to 6 ft., 30c; 6 to 8 ft., 50c; 8 to 10 ft., 75c.

MAPLE, NORWAY (Hard Maple). Is without a doubt one of the most desirable shade tree for street and lawn planting. Of rapidly growth, reaching a height of 60 feet at maturity. Studly, compact and vigorous, forming a round head of stout branches and broad, deep green leaves. Prices: 6 to 8 ft., $2.75 each; 8 to 10 ft., $3.50 each.

MAPLE, SUGAR (Rock Maple). One of the most useful of all maples, excellent for street and lawn planting and used extensively in the growing of maple syrup. A tree of magnificent proportions, often 80 feet in height, forming a round head of symmetrical shape. Long lived. Roots deeply, allowing grass to grow close about its trunk. Dark green leaves turning to scarlet and gold in autumn. Prices: 5 to 6 ft., $1.00 each; 6 to 8 ft., $1.50 each; 8 to 10 ft., $2.00 each.

MAPLE, SILVER LEAVED (Soft Maple). Leaves white underneath; of rapid growth; very ornamental and one of the best trees we have. 4 to 6 ft., 25c; 6 to 8 ft., 50c; 8 to 10 ft., $1.00.

MULBERRY, RUSSIAN. A very hardy low growing tree, 20 to 30 feet high with beautifully cut foliage and an abundance of fruit which attracts the birds. Not one of the edible varieties. 4 to 5 ft., 50c each.

OAK, RED. A massive tree with light grey bark and green, round lobed foliage that turns a beautiful red in the autumn. Excellent for parks and large lawns. Grows 60 feet and upwards. Price: 5 to 6 ft., $2.00 each.

OLIVE, RUSSIAN. Becomes a wide spreading tree of moderate height, conspicuous because of its silvery foliage; prized for planting in groups with other trees, the contrast in foliage makes a beautiful effect. It also makes a beautiful specimen tree. 4 to 5 ft., 50c each; 5 to 6 ft., $1.00 each.

PEACH, RED (Double Flowering). A beautiful small tree rarely over 20 feet tall in its blooming time in May every twig and branch bright with beautifully formed flowers, rendering a tree both showy and attractive at a distance. 3 to 4 ft., 50c each; 4 to 5 ft., 50c.

PEACH, Red Leaf. A very ornamental tree for its foliage. The leaves are blood red from early in the spring until frost. 2 to 3 ft., 25c; 3 to 4 ft., 40c; 4 to 5 ft., 50c.

PERSIMMON, American. This is the puckery persimmon, an inch or more in diameter, orange yellow, with a bright cheek when touched by frost. The tree is very ornamental, with a round topped head and handsome shining foliage. 4 to 6 ft., 75c.

PLANE TREE, ORIENTAL. A hardy rapid growing shade tree that does well in any kind of soil. Desirable for roadside planting, in parks and along rivers and streams for the protection of the banks. Used extensively for screen to hide unattractive buildings. Attains a height of 60 feet, and a maturity of 80 feet. Has bean-shaped, glossy green leaves, silvery white underneath; 5 to 6 ft., 50c each; 10 to 14 ft., 100 for $30.00; 8 to 10 ft., 75c each; 10 for $7.00; 100 for $35.00.

POPLAR, CAROLINA. A very rapid growing tree, giving shade in a very short time. Very easy to transplant and does well on any kind of soil. A desirable for roadside planting, in parks and along rivers and streams for the protection of the banks. Used extensively for screen to hide unattractive buildings. Attains a height of 60 feet, and a maturity of 80 feet. Has bean-shaped, glossy green leaves, silvery white underneath; 5 to 6 ft., 50c each; 10 for $4.00, 100 for $30.00; 8 to 10 ft., 75c each; 10 for $7.00; 100 for $35.00.

POPLAR, SILVER (Populus alba Bollomea). A tall, columnar tree, resembling Lombardy Poplar in growth, but more widely spreading and with silvery leaves. 4 to 6 ft., 50c; 6 to 8 ft., 75c; 8 to 10 ft., $1.25.

American Elm

Chinese Elm
Hardy Trees from the Heart of the Ozarks

TULIP TREE (Whitebark). One of the grandest of our native trees, of tall pyramidal habit, with broad, glossy, lidded leaves and beautiful tulip-like flowers, allied to the Magnolia. Leaf-color is changing, rather bluish-green shades which in fall turn brightest yellow. Yellow flowers are 1½ to 2 inches long, light greenish yellow marked at inside base with orange; appearing in May or June.

UMBRELLA CHINA TREE (or Texas Umbrella). A sub-varity of the China tree. It assumes a dense, spreading head, resembling a gigantic umbrella, and is of unique appearance.

WALNUT, BLACK. Valuable for nuts and timber. It is hardy and succeeds best on a rich, deep, moist soil. Too well known for long description. 4 to 6 ft., 50c each; 6 to 8 ft., $1.00; 8 to 10 ft., $1.50.

WILLOW, GOLDEN. A very showy yellow-barked tree reaching a height of 80 feet at maturity. A handsome tree at all seasons, but particularly conspicuous in winter and early spring before the leaves appear.

WILLOW, WEEPING, BABYLON. Our well-known weeping willow, a handsome tree, especially effective when planted near water. Grows 30 to 60 feet high. Price: 4 to 6 ft., 75c; 6 to 8 ft., $1.00 each.

POPLAR, Lombardy

POPLAR, LOMBARDY. A tall, narrow tapering tree, 60 feet high at maturity, a striking feature in any landscape. Fine for planting in groups, along driveways, or to make boundary lines. Sometimes used for tall screen hedges. 5 to 6 ft., 50c each; 10 for $4.50; 6 to 8 ft., 75c each; 10 for $7.00; 8 to 10 ft., $1.00 each; 10 for $9.00.

PRUNUS Pissardi (Purple Leaved Plum). A distinct and handsome tree, covered with a mass of small white single flowers in spring; later with showy pinkish purple leaves that deepen in color to the end of the season. 3 to 4 ft., 50c each; 4 to 5 ft., 75c each.

SYCAMORE, AMERICAN. A well known tree, very common throughout the United States; leaves heart shaped at base; the short lobes, sharply pointed, branches are wide spreading. 4 to 6 ft., 50c each; 6 to 8 ft., $1.00; 8 to 10 ft., $1.50.

SWEET GUM (Liquidambar styraciflua). A native tree that is perfectly hardy. The glossy foliage in summer, the brilliant color in the fall and the unusual appearance of the young branches with corky bark in the winter are considerations that make it especially valuable. 4 to 8 ft., 50c each; 6 to 8 ft., $2.00 each.

Surprised How Fast They Grew

Dear Sir:

Last Spring, 1938, I made my first purchase of fruit trees from the Benton County Nursery Company, Rogers, Arkansas. I have around one thousand trees which I bought at various times during the past ten years from different nurseries and I can truthfully say the trees I received in good condition from you, after setting them out, started right off to growing and are now two year old trees you sent me are tall now as some of the four and five year old trees are which I received from other nurseries.

The small one to two foot peach and plum trees I received from you, when I unpacked them I thought they weren't worth setting out, but as the old saying goes, "Big trees from acorns grow." I set them out and to my surprise they started to growing right off the bat and today they are each fine specimen trees which I surely am proud to show to my friends. This caused me to order more trees from you last Fall.

All your trees have measured right up to size specified and I've found the Benton County Nursery folks to be mightly good associates to deal with, because they live exactly right up to their standard of agreement. If you, for the very fine folks of the Benton County Nursery Company.

This Spring I have some very tempting offers made to me from other Nurseries. However, I shall send you another order for trees which you will find enclosed herewith.

Yours very truly,

Daniel H. Yeager
R. No. 1, Ft. Recovery, Ohio.

March 20, 1939

BENTON COUNTY NURSERY CO., ROGERS, ARKANSAS

SHRUBS

ABELIA GRANDIFLORA. An attractive dwarf shrub, suitable for a sunny sheltered position where the winters are not extreme, with small shiny foliage which is almost evergreen. The flowers are small, but very pretty and numerous, in loose terminal panicles; color, white flushed with pink. This shrub is rarely without some blooms from May into November. 2 to 3 ft., 40c.

ALMOND. Early spring flowering shrubs, gayly in full bloom before the leaves appear, with beautiful double flowers of rose or white, snuggling tight to the twigs. Double White and Double Pink. 1½ to 2 ft., 40c each.

ALTHEA (Rose of Sharon). Bloom late in June until frost, with a profusion of large and brightly colored flowers much like the tender Hibiscus in form. These are the color spots of fall, as Lilac and Wiegela are of spring. The late appearing foliage is extra good color and valuable foliage beauty. Grown in standard form, they attain 10 to 12 feet in height and make attractive specimens. Potted more compactly and occasionally pruned, they are both serviceable and showy as hedges. Double Rose, Double White, Double Purple and Double Red—2 to 3 ft., 35c each; 3 to 4 ft., 50c each.

ARROWWOOD (Viburnum Dentatum). Attractive green leaves turning to red in fall, white flowers in May followed by small black berries each 1 inch, deciduous in moist soil and grows 6 to 8 feet 2 to 3 ft., 40c each.

BARBERRY, Thunbergi (Japan Barbary). There is no shrub with a history so long or so interesting as this. It is dwarf growing, uniformly bushy and rounded in form, susceptible to formal pruning, with small, leathery leaves densely covering the thorny twigs. These give it paramount importance for use as a filler and edging for shrubbery groups; as a foundation screen in front of porches and, above all, as a compact, impenetrable, hardy, low hedge for confining fawns in accordance with seasonable conditions. Autumn paints the foliage scarlet or bronze, and shuns the branches with crimson fruits 12 to 18 inches, 20c each; 12 to 24 inches, 25c each; 24 to 30 inches, 40c each.

THE NEW RED LEAF BARBERRY. About same as Japan Barbary only the foliage is blood red. The foliage is a bright red when it appears in the spring and will grow into a darker red as the season advances. It should be grown in places with as much exposure to the sunshine as possible, as the sunshine is what makes the bright red color of the foliage more distinct. For many purposes it has no equal. 12 to 18 inch, 25c each; 18 to 24 inch, 40c each.

BASTARD INDIGO (Amorpha fruticosa). Of spreading habit, with feathery foliage; flowers in long panicles, dark purple in color, 10c each.

BEAUTY FRUIT (Celastrus pomufur). A pretty shrub of low growth, blooming profusely in mid-summer, followed by large clusters of violet berries, which persist until after frost; flowers lilac-violet. 25c each.
Make Your House a Home....

Plant Our Flowering Shrubs

The planting of ornamental shrubs is very largely on the increase, and this is as it should be, for with a good selection the lawn can always be beautiful. They are mostly of medium size, enabling one to plant a great variety on a small plot, and the wonderful assortment of foliage from the darkest green and purple to light orange and silvery tints. This in addition to the great variety in the blossoms, all unite to keep up a never failing interest. We have selected the very best of hardy shrubs.

**Butterfly Bush** (Buddleia). A very hardy, vigorous shrub with large glossy foliage; flowers in dense, ball-like heads; creamy white and fragrant; does well in shady places and moist locations. 3 to 6 ft., 25c each.

**Button Bush** (Cephalanthus). A very hardy, vigorous shrub with large glossy foliage; flowers in dense, ball-like heads; creamy white and fragrant; does well in shady places and moist locations. 3 to 6 ft., 25c each.

**Calycaanthus** (Carolina All Spice). A unique shrub growing upright to 6 ft., holding its straight, strong, reddish brown shoots with large glossy leaves, from the axis of which spring old double, spidery fragrant flowers of chocolate red. 18 to 24 inches, 25c each.

**Caragana** (Siberian Pea Tree). A large shrub with beautiful leaves of bright green color; flowers yellow in small clusters in late spring; splendid for massing; does well on most all soils and in partly shaded places. 2 to 3 ft., 25c each.

**Crape Myrtle** (Lavatera). The most gorgeous of all blooming shrubs for the Southwest. Blooms throughout the entire summer; withstands droughts wonderfully. Crape Myrtle is very effective for hedges, and is at its best when pruned every winter and not allowed to grow in tree form. We can furnish pink, red and white. 2 to 3 ft., 25c each; 3 to 4 ft., 40c each.

**Cydonia** (Flowering Quince). A popular dainty shrub, growing from 3 to 8 feet high. The scarlet flowers appear before the leaves, giving a brilliant glow to the bush, even from a distance, excellent in shrub groups or as a hedge. 2 to 3 ft., 25c each.

**Deutzia** (Pride of Rochester). Upright, fast grower, 6 to 8 ft. Flowers in large panicles are pinkish white in late May.

**Deutzia** (Craciis). Called slender or dwarf Deutzia. Upright, fast grower, 2 to 3 ft., with abundant white flowers, in April or early May. Very hardy. Useful as edging for walks and for garden borders and in front of shrub masses. Endures partial shade. 1 to 2 ft., 25c each.

**Dogwood** (Red Osier). A spreading shrub branches in winter are a dull purplish red color; leaves dark green above, whitened beneath; flowers creamy white in dense flat topped clusters, followed by white berries. 2 to 3 ft., 25c.

**Dogwood** (Golden Twigg). A form of the Red Osier having yellow branches and canes, effective when mixed with the red stemmed kinds. Dogwood makes beautiful plantings along streams and water pools. 2 to 3 ft., 25c each.

**Elder** (Elders). These splendid old shrubs growing 8 to 10 feet tall eventually light up the garden with glinting masses of yellow very early in spring before leaves appear. The upright forms make excellent tall hedges, and are bright hued fillers for massed shrub groups. 2 to 3 ft., 25c each. Intermedia. The earliest blooming. Fortunei. The most upright in growth. Suspansa. Slender, limply drooping branches, stunted with bright clusters of yellow blooms and shiny leaves. These are airily graceful, swaying looses from trolley top or garden wall; mingle pleasantly with the trailing growth of Honeysuckle.

**Forsythia** (Golden Bell). These splendid old shrubs growing 8 to 10 feet tall eventually light up the garden with glinting masses of yellow very early in spring before leaves appear. The upright forms make excellent tall hedges, and are bright hued fillers for massed shrub groups. 2 to 3 ft., 25c each. Intermedia. The earliest blooming. Fortunei. The most upright in growth. Suspansa. Slender, limply drooping branches, stunted with bright clusters of yellow blooms and shiny leaves. These are airily graceful, swaying looses from trolley top or garden wall; mingle pleasantly with the trailing growth of Honeysuckle.

**Hamamelis Vernalis**. Is one of the most desirable shrubs ever grown. This species of Witch Hazel (6 to 8 ft.) has broad dark green leaves and, in this section, blooms profusely in January and February. The blooms are small and delicate and are usually reddish orange with some showing yellow. Very fragrant, hardy and easily transplanted. 2 to 3 ft., 25c each.
Surround Your Home with Graceful Color and Beauty from

**Honeysuckles**

2 to 3 ft., 25c; 3 to 4 ft., 35c.

The upright Honeysuckles have bright pretty flowers followed by showy berries that last through the fall. Very desirable bulk for screening hedges, and the nucleus of tall shrub groups. First of the shrubs to clothe themselves in spring verdure.

**Winter Honeysuckle.** The white flowers of this variety often open before the snow has come. A pleasing white fluffy delicate fragrant bloom. The foliage is of a very attractive shade, and remains green until hard freezing weather.

**Morrowi Honeysuckle.** This is one of the most vigorous of the white flowered kinds, becoming from 6 to 8 feet tall. The foliage is of dark restful green and held until late in the season. In early spring the bush is like a ball of snow, because of the profusion of blooms. During mid-summer the bright red berries contrast strikingly with the foliage and give the bush great attractiveness.

**Tartarian Honeysuckle.** The most extensively used of the older varieties of Bush Honeysuckles. There are a number of varieties, some having flowers of distinctly reddish hue, some pink and some white. All bloom very freely and in mid-summer carry loads of brilliantly colored berries, usually of bright red. We can supply Tartarian Honeysuckle in pink, red or white flowers.

**Hydrangea**

2 to 3 ft., 25c each.

The massiveness of bloom on these valuable shrubs and their long blooming season, assure them a place in any group where solid white effects are required.

**Arborescens Grandiflora** (Hills of Snow). The flowers are, in a large way, similar to the familiar “Snowball” in appearance; conspicuously white and imposing. July to September. To the crown each spring, the bushes may be kept round and dense at a normal height of three to five feet. They are excellent for solid low borders or in foundation plantings which will allow for about four feet.

**Panicle Grandiflora.** Fine tall hedges, or if planted in rich soil and severely pruned every spring before the leaf buds open, will get to be very dense, dwarf clumps of compact form, wonderfully attractive when laden with their massive white plumes. Large beds kept at a uniform development, are extremely showy, first snowy white, then pink, then reddish-bronze and green in stage total camellia. Planted rather well back in the intervals between other shrubs, the projecting flower wands arching from the ground are extremely conspicuous and effective.

**French Hydrangeas**

2 Year Plants, 75c Each

**French Hydrangeas.** In gorgeous colors. These most beautiful hydrangeas that grow can be grown outdoors in this section where it gets 20 degrees below zero by mulching them in the late fall for the winter with old straw, leaves or manure. Lay the tops down and cover with this mulching so they will be well protected from the hard freezes. In the spring, remove this mulching and straighten the tops up and they will bloom nicely for you.

**Bouquet Rose** (Rose and Pink). Large trusses of well formed flowers, rosy amber, turning to bright pink.

**Maurice Hamar** (The famous Blue Hydrangea). With us a beautiful placidly blue, large flowers and profuse bloom.

**Persian Lilacs**

**Purple (Syringa).** It is the well known purple fragrant variety.

**White (Common).** Is also fragrant but flowers are white.

**Persian Lilac.** A graceful shrub with finely cut foliage: and delicate lavender blossoms, blooms not so large as the common purple, but it is a more graceful shrub. Also have Persian Lilac in white. 2 to 3 ft., 40c each.

**Mock Orange** (Philadelphus)

**Mock Orange** (Philadelphus coronarius). The old fashioned “Sweet Syringa” with fragrant white flowers. The long branches covered with a profusion of starry white flowers are exceedingly beautiful blooms in early spring. Suitable for massing with other shrubs or planting as specimens.

**Mock Orange** (Virginia). One of the most beautiful, new, ever-blooming varieties. This new Philadelphus which is being used so much here and growing just makes a wonderful individual specimen plant for the lawn. A vigorous, tall-growing plant with very large, double crested flowers with round petals. Pure white, sweetly scented, clusters of small white flowers 2 to 3 ft., 35c; 2 to 3 ft., strong plants, 50c each.

**Nanny Berry** (Viburnum lentago). A large shrub or small tree, flowers white in flat topped clusters. 2 to 5 inches broad fruit oval, bluish black. 2 to 3 ft., 30c each.

**Prunus Pissardi** (Purple Leaved Plum). A distinct and handsome little tree, covered with masses of thin, white blossom in spring; later with showy pink purple leaves. 2 to 3 ft., 25c to 3 ft., 35c.

**Triloba (Double Flowered Plum).** A charming shrub of vigorous growth, very early in spring, before its leaves appear, the whole tree is decked in a fleecy cloud of very deep rose pink bloom. 2 to 3 ft., 40c each.

**Kolkwitzia**

**Beauty BUSH** (K. amabilis). A recently introduced shrub which bids fair to become one of the very best. Growth upright in the center, with outer branches arching. Bell shaped flowers borne in pairs forming a cluster of 4 or 5 or a color to the end of the season. 3 to 4 ft., 50c each.

**Lespedeza** (Desmodium)

Half shrubs, the long canes of each season’s growth usually winter killed, the stools become shrubs, make shoots and forming a thick shrub 3 to 7 feet high, in showy late summer bloom.

**Sieboldi** (Desmodium Pendulum). Arching branches and long, close drooping racemes of purple magenta flowers. 2 year plants, 25c each.

**Lilacs (Syringa)**

**Mock Orange.** (Philadelphus aviculare). Grows to only about one half the height of the old fashioned “Sweet Syringa.” Its slender arching branches make it probably the most graceful of the species. Flowers frequently cover the entire length of the branches and are very sweet scented. Blooms in late spring. 2 to 3 ft., 35c each.

**Mock Orange** (Philadelphus coronarius). The old fashioned “Sweet Syringa” with fragrant white flowers. The long branches covered with a profusion of starry white flowers are exceedingly beautiful blooms in early spring. Suitable for massing with other shrubs or planting as specimens. 2 to 3 ft., 40c each.

**Mock Orange** (Virginia). One of the most beautiful, new, ever-blooming varieties. This new Philadelphus which is being used so much here and growing is making a wonderful individual specimen plant for the lawn. A vigorous, tall-growing plant with very large, double crested flowers with round petals. Pure white, sweetly scented, clusters of small white flowers 2 to 3 ft., 35c; 2 to 3 ft., strong plants, 50c each.

**Nanny Berry** (Viburnum lentago). A large shrub or small tree, flowers white in flat topped clusters. 2 to 5 inches broad fruit oval, bluish black. 2 to 3 ft., 30c each.

**Prunus Pissardi** (Purple Leaved Plum). A distinct and handsome little tree, covered with masses of thin, white blossom in spring; later with showy pink purple leaves. 2 to 3 ft., 25c to 3 ft., 35c.

**Triloba (Double Flowered Plum).** A charming shrub of vigorous growth, very early in spring, before its leaves appear, the whole tree is decked in a fleecy cloud of very deep rose pink bloom. 2 to 3 ft., 40c each.

**Kolkwitzia** (K. amabilis). A recently introduced shrub which bids fair to become one of the very best. Growth upright in the center, with outer branches arching. Bell shaped flowers borne in pairs forming a cluster of 4 or 5 or a color to the end of the season. 3 to 4 ft., 50c each.

**Lespedeza** (Desmodium Pendulum). Arching branches and long, close drooping racemes of purple magenta flowers. 2 year plants, 25c each.

**Philadelphus Virginianus**

BENTON COUNTY NURSERY CO., ROGERS, ARKANSAS
Flowering Shrubs. They Will Radiate Early Spring Until Fall

RHAMNUS Catharticus (Buckhorn). A dense twiggis bush, 6 to 10 feet high, with dark foliage relieved by masses of attractive white flowers in June and July. Makes a good prunable hedge. 2 to 3 ft., 40c; 3 to 4 ft., 50c.

RHUS (Sumac). Picturesque, gaily, wind bent rows of Sumac blazing redly in autumn are familiar landmarks in every countryside.

Glabra (Smooth Sumac). Grows to a small tree with beautiful leaves which color brilliantly in autumn, flowers in July followed by crimson or brown fruits. 2 to 3 ft., 25c each; 3 to 4 ft., 30c each.

Typhina (Ceg Horn Sumac). Picturesque and rugged in all stages of development to its small tree maturity of about 30 feet. Its flowers are borne during June and July in dense terminal panicles, followed by impressed red fruits. 2 to 3 ft., 35c; 3 to 4 ft., 40c.

SNOWBALL (Viburnum opulus sterile). An old favorite. Rather tall growing, foliage large and coarse; showy flowers in large white "balls" in April. 1 to 2 ft., 30c each; 2 to 3 ft., 35c each; 3 to 4 ft., 40c each.

SNOWBALL, JAPAN (Viburnum tomentosum pli- catum). A strong vigorous growing shrub with spreading branches and large dark green rough leaves. Flower clusters are white and globose. The fall coloring of the foliage is especially fine. 2 to 3 ft., 50c each; 3 to 4 ft., 75c each.

SPICE WOOD BUSH (Benison). Flowers yellow and bloom in the spring before the foliage appears. The berries are scarlet in the late summer and early fall. The foliage is attractive and very aromatic; it thrives in moist places. 2 to 3 ft., 25c each.

SPIREA

All the Spireas bloom with a riotous extravaganza, style, color and habits of growth differing so markedly that a collection of varieties will delight the entire season and still evade repetition.

TRICHOCARPA (Korean Spirea). A handsome new introduction favoring Van Houttei in character but with interesting differences.

The flowers are larger than Van Houttei with a distinct eye, in dense, strap-like clusters, these appear a short space following the older Bridal Wreath, and thus prolong the showiness of this shrub. Thrifty and hardy. 1½ to 2 ft., 35c each.

ARGUTA. A slender upright shrub. The first Spirea to bloom in the spring, its branches being covered with a snow of blossoms before the leaves appear. 1 to 2 ft., 35c each.

ANTHONY WATERER. Dwarf, bushy, of spreading type with large corymbs, brilliantly colored rosy crimson. Very free flowering, at its best in late summer. This is one of the very good showy red flowering shrubs sufficiently dwarf to be used in foundation planting in low front of shrub groups. 15 to 18 inches, 35c each.

SYMPHORANCUS. 3 to 5 ft. Highly valued for use in densely shaded situations and for the striking beauty of their bright persistent fruits.

Snowberry (S. Racemosus). Inconspicuous rose colored flowers in June and July; followed by large clustered, milk white fruits which remain far into winter. The combination of pink flowers and white berries on the same twig is charming. Foliage is rounded clean and fresh looking, a glaucous green 2 to 3 ft., 30c each; 3 to 4 ft., 40c each.

Indian Currant (S. Vulgans). Similar to the Snowberry except that its fruits are dull red, and that the smaller berries cluster in thick ropes along the weighted down stems. The foliage is small, close-set and dark which with the uniform spread of its branches compares favorably with the Privets in mass effects. Mail size, 10c each; 2 to 3 ft., 20c each; 3 to 4 ft., 30c each.

TAMARIX

TAMARIX. Tall growing shrubs, 8 to 12 feet high, with fine feathery foliage like that of the juniper; small yellowish pink flowers from April on. Splendid for seaside planting or equally good in dry sand. 2 to 3 ft., 40c.

Odessana (Caspiam Tamarix). 2 to 6 feet. Exquisitely feathered foliage of silvery green, blooming in July and August with large loose panicles of lavender-pink flowers. Better shrub than Tamarix, more bushy and spreading than the others. 2 to 3 ft., 40c; 3 to 4 ft., 50c.

WEIGELIAS

Coarse, thrifty shrubs for medium and back rows up to 8 feet, their delightful blooming period ranging from May into July. The flowers are showy, a mass of small bright colored flowers on long slender stems.

Candida. 4 to 6 feet, a choice variety blooming in the greatest profusion during June, and more sparingly at intervals thereafter. 2 to 3 ft., 30c each; 3 to 4 ft., 40c each.

Era Rafike. One of the most distinct and one of the most attractive varieties; flowers deep carmine red. 2 to 3 ft., 60c each.

Hendersoni. One of the strongest growing varieties with large flowers of deep rose. 2 to 3 ft., 30c each.

Rosea. Most popular of all; tall growing, very vigorous with deep pink flowers in the greatest profusion during June, and more sparsely at intervals thereafter. 2 to 3 ft., 30c each.

Rosa Nana Variegata. Leaves broadly marbled creamy white; flowers pink. Dwarf; one of the most useful and choice variegated leaved shrubs. Height to 2 ft., 40c each.

WINTER BERRY (Ilex decidua). In the late fall and early winter this shrub is very showy when the naked branches are heavily burdened with bright red berries, grows on great variety of soils and partially shaded places. 2 to 3 ft., 45c each.

WITCH HAZEL (Hamamelis). This beautiful shrub will grow under favorable conditions 10 to 12 feet high; ribbon like, yellow flowers in the late autumn, large attractive foliage, good for natural planting and shady places. 2 to 3 ft., 40c each.
EVERGREENS for Year-Round Beauty

Due largely to their regular and very pleasing outlines and the fact that they retain their foliage and color all the year, evergreens have become exceedingly popular for private and public planting. Their varied shades of blue, silver, golden and green permits a most attractive combination of colors. Planted about the foundation of a home they hide the sharp outlines of dwellings and form a very pleasant and striking background for shrubs and perennials, and in winter give an appearance of coziness and warmth not attained by any other class of trees.

**ARBORVITAE**

**AMERICAN ARBORVITAE.** A splendid native that grows well anywhere and thrives over a wide range of climate. The habit is erect and pyramidal, the foliage soft and light green in color. This Arborvitae should be included in groups and all evergreen plantings. They are unequalled as tall hedges to form screens for unsightly objects or for shelter belts or as a blind about clothes yard, etc. They grow quickly and if planted closely in hedges give the desired effects promptly. They may be kept at any height and made more dense and bushy by trimming, which they endure readily. 1 to 2 ft., $1.25; 3 to 4 ft., $2.00; 4 to 5 ft., $3.00.

**AMERICAN PYRAMIDAL ARBORVITAE.** This exceedingly beautiful Arborvitae is the most compact and erect of the entire species, being in form almost a counterpart of the Irish Juniper. Foliage a deep green, retaining color remarkably well through the entire season and perfectly hardy. 1 to 2 ft., $1.00; 2 to 3 ft., $2.00; 3 to 4 ft., $3.00; 4 to 5 ft., $4.00.

**GLOBE ARBORVITAE.** A new variety that is very handsome. In shape it is absolutely round or globular, very dense in growth, and does not require shearing. It does not grow over 4 to 5 feet tall; foliage is deep, dark green, its little branches being of unusual delicacy. Be sure to order one or more of these beautiful and attractive species and we will guarantee that it will please you. This is one of the most rare of the dwarf evergreens. Our trees are well rooted, transplanted and root pruned. 18 to 24 inches, $1.50; 24 to 30 inches, $2.00.

**BERCKMAN’S GOLDEN ARBORVITAE (Fr. Orientalis Aurea Nano).** A perfect gem for garden, cemetery lots, formal plantings, window boxes and tubs. It is of dwarf, compact and symmetrical growth, with golden yellow foliage. 18 to 24 inches, $2.00; 24 to 30 inches, $3.00; 30 to 36 inches, $4.00; 3 to 4 ft., $5.00.

**BALLED AND BURLAPPED (F. O. B. Rogers, Arkansas)**

Balled and Burlapped means that these Evergreens are taken up with a ball of dirt around the roots and then burlap and strawed around them. By doing this assures you of receiving these in first class condition. These are not prepaid.

**CHINESE COMPACT ARBORVITAE (Baker’s Golden).** A low, formal, and very compact variety with bright green foliage, attractive and a great favorite. 3 to 4 ft., $2.00; 4 to 5 ft., $3.00; 5 to 6 ft., $4.00.

**CHINESE PYRAMIDAL ARBORVITAE (T. Orientalis Pyramidalis).** One of the tallest and hardest varieties; of pyramidal habit and bright green foliage. 3 to 4 ft., $2.00; 4 to 5 ft., $2.50; 5 to 6 ft., $3.00.

**CEDARS**

**CEDRUS DEODARA (Himalayan Cedar).** A broad growing pyramidal tree to 30 feet in height; of rapid growth with wide spreading drooping branches. The foliage is beautiful bluish-green. 2 to 3 ft., $2.50; 3 to 4 ft., $3.00; 4 to 5 ft., $4.00.

**CYPRESS (Cypress, Arizona (Cupressus Arizonica)).** Brilliant silvery-blue foliage, growth rather compact, with branches somewhat stout; red bark. 2 to 3 ft., $2.00; 3 to 4 ft., $3.00; 4 to 5 ft., $4.00; 5 to 6 ft., $5.00.

**FIR**

**DOUGLAS FIR.** Large, conical form, branches spreading, horizontal. Leaves light green above, glaucous below. 2 to 3 ft., $3.00; 3 to 4 ft., $4.00; 4 to 5 ft., $5.00.

**THE JUNIPERS**

**SILVER JUNIPER.** Compact, conical form becoming 30 feet tall of maturity, and one third as broad. Foliage of attractive glaucous blue, 3 to 4 ft., $4.00; 4 to 5 ft., $5.00.

**JUNIPERUS VIRGINIANA:** Green or bronze green foliage; a tall growing, hardy tree of quick growth. At home almost anywhere in the South and now being largely used in landscape planting; the tree from which the pencil wood is obtained. 3 to 4 ft., $2.00; 4 to 5 ft., $3.00.
Increase the Attractiveness and Value of Your Home-Plant Evergreens

THE PINES

PINE, Muho (Pinus montana muhga). This is an excellent dwarf pine, being globe-shaped and erect branching. It is very attractive, especially in spring, when the new growth which seems like miniature candles completely covers the trunk, 8 inches wide, $2.00; 18 to 24 inches wide, $2.50.

AUSTRIAN PINE. From Central Europe. Leaves or needles still and dark green, hardy everywhere and one of the most valuable conifers for specimen trees or windbreaks, etc. 2 to 3 ft., $1.50; 3 to 4 ft., $2.00.

NORWAY PINE (Red Pine). A two-leaved pine native to Newfoundland, one of the most ornamental of evergreens, and excellent for hedges, suitable for clay soil, handsome foliage, excellent for bold effects. Price 2 to 3 ft., $1.00; 3 to 4 ft., $2.00.

SCOTCH PINE. A rapid grower, very hardy from central portion of Europe, with short, rigid, light green leaves, very valuable for masses, specimen and screens. 1 to 3 ft., $1.50; 3 to 4 ft., $2.00.

WHITE PINE. An old and well known native tree, of eastern North America. An account of government quarantine this variety cannot be shipped west of Arkansas. 2 to 3 ft., $2.00; 3 to 4 ft., $3.00.

SPRUCE

COLORADO BLUE. The queen of the spruces family; the color is a beautiful blue, which holds well all through the year; this is one of the most valuable of ornamental evergreens. 1 to 2 ft., $3.00; 2 to 3 ft., $5.00; 3 to 4 ft., $7.50.

BLACKHILL SPRUCE. A compact, shapely tree of a dark green color. It will endure cold and dry weather and consequently driven under adverse conditions transplants very easily and because of its dense, sturdy growth is an excellent choice for planting. 2 to 3 ft., $2.00; 3 to 4 ft., $3.00; 4 to 5 ft., $4.00.

NORWAY SPRUCE. Becomes a tall tree of majestic beauty. One of the most rapid growing and shapely of the tall dark green spruces. 2 to 3 ft., $2.50; 3 to 4 ft., $3.50; 4 to 5 ft., $4.50.

WHITE SPRUCE. One of the best conifers, especially for cold climates. Compact, upright, and holds its branches to the ground, aromatic, drought resistant, varies in color from light green to bluish green. 2 to 3 ft., $2.00; 3 to 4 ft., $3.00; 4 to 5 ft., $4.00.

NATIVE EVERGREENS

Not Budded and Burlapped

JUNIPERUS VIRGINIANA. Our native of the Ozarks is one of the most beautiful of all the Cedar types. It adapts itself to most all soils and climates. It is a very fast grower. It is one of the most useful and characteristic trees of our American landscape, because of its beautiful form and dark green bluish foliage. In season the trees bear bright blue and alylary berries, containing the seeds, which require, under natural conditions, two years to germinate. The berries are a great attraction for the birds. The Red Cedar can be trimmed into any shape or size which makes it desirable for hedges as well as for specimen trees and for windbreaks. Plenty of Red Cedar about your home, planting will always give entire satisfaction.

PINES. Our native. We desire to advise the planting of a pine wherever a strong, hardy, evergreen is wanted. In groups or for avenues in particular situations it is one of the most suitable. A few of our common pines to mention are: 5 to 10 ft., $3.00; 10 to 12 ft., $4.00. In special cases, 12 to 15 ft., $5.00; 15 to 18 ft., $6.00; 18 to 21 ft., $7.00; 21 to 24 ft., $8.00; 24 to 30 ft., $9.00. All prices are per dozen.

BROAD LEAVED EVERGREENS

ABELIA (Abelia rupestris grandiflora). A beautiful low growing evergreen flowering shrub; bearing glossy dark green contrasting effectively with the red tinged bark. The numerous small white tinged pink flowers resemble miniature Azaleas, having comparably deep, slender throat through the individual flower is only about three quarters of an inch in length. Bumper June until frost; distinctly sweet scented. Occasionally a "wild" Vigorous growing shrub appears which should be pinched off when a dense shrub is desired. 2 to 3 ft., $1.00; 10.00 per dozen.

AZALEA AMOENA. A bushy, dwarf grower with small green leaves that deepen to a lustrous copper hue in winter. In April or May the whole plant is covered with a mass of brilliant, claret-colored flowers that retain their beauty for several weeks. Very ornamental and desirable for edging of drives and walks or for bordering beds of Kolmia, Illex, etc. 10 to 12 inches. $2.50; 12 to 15 inches. $3.00.

BOXWOOD, Buxus sempervirens. Everyone is familiar with Boxwood and its good qualities. There is hardly a plant that can be used in quite so many positions. For edging as specimen for urns, window boxes, it is very useful. The foliage is always a shining dark green even through the winter. It is a heavy feeder and should never be planted in soil unless it can get plenty of fertility and moisture. 12 to 18 inches, $1.00; 18 to 24 inches, $2.00; 2 to 3 feet, $5.00.

CAPE JASMINE (Gardenia jasminoides). Medium height; foliage thick, dark green in color; large, white waxy flowers with extremely sweet odor; blooms in early spring and occasionally again in fall. 2 to 3 feet, $1.50 each, $5.00 per dozen; 7 to 10 feet, $14.00 per dozen.

EVERGREEN EUONYMUS (Euonymus japonicus). One of the best broad leaf evergreens for the Southwest. Luxuriant in growth and naturally adapted to a hilly location or a raised site, it may be kept in almost any desired shape by pruning; leaves occasionally followed by bright red berries. 12 to 18 inches, $1.00 per dozen.

HOLLY AMERICAN (Ilex opaca). Everyone certainly knows the native holly with its large, glossy green leaves. Native holly, grown plants are comparatively easy to transplant provided the leaves are clipped off at planting time. This native is not half as appreciated as it can be sheared into compact hedges, or if left to develop naturally makes a bush or small tree that is wonderful at all seasons of the year. 1 to 2 ft., $2.00; 2 to 3 ft., $3.00.

MAGNOLIA GRANDIFLORA. The grandest of evergreens and flowering trees. Has large, fragrant, white or pink flowers at certain parts of Pennsylvania, Virginia and North Carolina. Very attractive for natural effects along walks and drives. Prices 2 to 3 feet, $3.00 each.

Blue Spruce

AUSTRIAN PINE

JUNIPER, Irish. Erect, slender, and formal in habit; column or pyramidal form; foliage sage green very compact; perfectly hardy and a real beauty in combination with other forms and colors of evergreens. Prices 1 to 2 ft., $1.50; 2 to 3 ft., $2.50; 3 to 4 ft., $3.50.

JUNIPER, Andora. One of the finest spreading Junipers of recent introduction. Grows closer to the ground than the Pittner. During summer it has a silver reflex to the otherwise green foliage, in winter it turns a purplish cast, which is unusual in evergreens. 24 to 30 inches. $2.00 each.

Austrian Pine

Hardy Trees, Plants and Vines from the Heart of the Ozarks

29
GORGEOUS EVERBLOOMING ROSES

The Queen of Flowers

Beyond question the rose is the most beautiful and satisfactory of all flowers. In the South we are particularly fortunate in being able to grow outside many varieties not hardy enough to withstand the rigid northern winters. We believe that we know Roses, know those varieties best adapted to southern culture and conditions. We grow annually great quantities of Roses, numbers of which are not suitable to southern culture, but the list we offer in this catalog we offer with the assurance that each and every one of them is the best of its class and color

Your Rose garden should be located where the plants will have plenty of sunlight and where the roses will not be affected by large trees or shrubs, either shading them or drawing nourishment from the soil. Clay or sandy soil is best and there should be plenty of well rotted manure worked into the soil before planting. The plants should be cultivated frequently and kept absolutely free from weeds and grass. All old and decayed branches should be cut off as the flowers are borne only on the new growth. Protect in winter by growing in a depression of leaves or coarse manure, which may be removed or worked into the soil in the spring.

Hardy Hybrid Tea Roses. Fragrant and ever-blooming. 1 year old, field grown, 25c each. $2.50 per dozen. 2 year old, field grown, 40c each: $4.00 per dozen.

AMERICAN BEAUTY. Large, globular, crimson buds. A very popular variety which always wins admiration with its beauty and perfume.

BETTY UPRICHARD. Copper-red buds, opening to semi-double, large blooms of delicate salmon-pink, with reverse carmine having coppery sheen. One of the best bloomers.

BRIARCLIFF. Very much like Columbia but a deeper rose-pink. Good growth and free blooms.

COLUMBIA. Beautiful peach-pink, deepening as it opens. Superior shaped buds on very long and nearly thornless stems of good length. Very hardy. Beautiful foliage.

CRUSADER. Rich, crimson buds of moderate size and excellent shape.

DAME EDITH HELEN. A beautiful shade of clear pink, freely produced on long stems. Pointed blooms. Grows well.

ETOILE DE HOLLANDE. Very large, well built, brilliant red blooms. Fragrant. One of the best new garden roses.

FRANCIS SCOTT KEY. One of the largest reds. Color is a beautiful crimson-red shading to cerise, and has a profusion of petals opening to a higher center. Thrifty grower. Very hardy. Beautiful foliage.

FRAU KARL DRUSCHLI. The "White American Beauty." Large flowers of waxy paper white in June, yielding their final outburst with the first snow fall.

GRUSS an TEPLITZ. Brilliant deep red with velvety crimson sheen. Its hardness, beautiful foliage and great blooming qualities make this one of the finest roses for massing.

HADLEY. A rich crimson-red flower with velvety texture. Moderate in bloom and growth. Highly recommended for cut flowers.

Kaiserin Augusta Viktoria. Queen of white roses. Purely white with splendid large buds and superb, full double blooms. A prolific and continuous bloomer.

KILLARNEY. Pink. One of the finest pink roses ever introduced. Especially beautiful in coloring.

LOS ANGELES. Flowers of pale salmon-pink richly shaded with deep rose and gold.

LUXEMBOURG. Flowers deep orange, with long pointed buds on graceful stems. Beautiful foliage. Strong, thrifty grower.

MARGARET MCDONALD. Orange-vein filling blooms with light green healthy foliage. One of the best for home gardens.

MISS ROWENA THOM. Blooms of brilliant satiny pink, with orange-flame center.

MME. EDOUARD HERBIOT. Semi-double blooms of orange and copper. The original of all the bright orange-pink varieties.

MRS. AARON WARD. Fine, fawn-colored buds and open blooms. An excellent buttonhole variety.

MRS. CHAS. BELL (Shell Pink Radiance). A sport of Radiance and like it except in color; a very, very even shade of soft, clear shell-pink.

MRS. E. P. THOM. The fine, long buds open into perfectly shaped flowers of rich, lemon-yellow.

PADRE. Flowers of copper-scarlet with bright yellow at base of petals. Erect growing with light yellow foliage. One of the best new roses.

PAUL NEYRON. One of the largest and hardest roses ever grown. Excellent bloomer. Has long, smooth, thornless stems. A bright, ruddy pink.

PRES. H. HOOVER. A glorious new multi-colored rose, unfolding its broad, shuck petals unhurtfully from the beautiful pointed bud. Vivid, cerise-pink, softly flamed with yellow orange, and scarlet; this combination most emphatic on the reverse. The perfume is exquisite, the foliage ornamental.

RADIANCE. One of the most magnificent garden varieties with large pointed buds which are rosy-carmine on the outside of petals and light, silvery-pink on inside. Very beautiful. Very vigorous.

RADIANCE. RED. Beautiful red sport of Pink Radiance and like it except in color. Stands second among the best twelve roses of its class in America.

REV. E. PAGE ROBERTS. Double golden-yellow blooms striped with copper and red-dish-ruff on outside. Free bloomer. One of the most popular of all roses.

Sensation. Long, pointed blooms of scarlet-crimson. Plant strong and very active.

SUNBURST. Flowers of golden-orange and deep yellow, varying at different stages of development.

TALISMAN. A gorgeous assemblage of colors, exhibiting mostly gold, apricot-yellow, blood-orange, deep pink and old-rose. The bud is long and shapey, developing into medium-sized, compactly double flowers. Free bloomer; glossy foliage.

WILLOWMERE. Coral-red buds open into rich, shrub-pink flowers, shaded yellow in the center and toning as they develop into other hues, always attractive. Very hardy; free bloomer.

NEW ROSES

Two-year-old field grown, 60c each: $6.00 per dozen.

AUTUMN. Burnt orange buds, opening to medium size; very double flowers of bright yellow, streaked with red. Strongly upright growth and free-blooming habit.

DAVID O. DODD. The long looked for Crimson Bush Rose. The new rose that causes a sensation everywhere. Produces in most profusion, flowers 5 to 7 inches across with as many as 50 or 60 petals, on a strong bush, growing to the height of 3 to 4 feet. The magnificent, deep, dark crimson flowers, flushed deep scarlet, are borne on long, stiff stems. Hardy in all sections of the country. A gorgeous new rose with the most fragrant perfumes.

GOLDEN DAWN. Large pointed buds of bright yellow, tipped with red. Flower long, well shaped, deliciously fragrant. Free foliage.

JULIAN POTIN. A clear yellow rose of vigorous, erect habit, with very shapely flowers of good yellow.

LADY MARGARET STEWART. Immense copper-petals opening to bright golden flowers of wonderful form and color.

SOUV. de CLAUDIUS PERNET. The sensation of the day in yellow roses. Large, sunflower-yellow blooms, perfectly formed, very fragrant. Dark, glossy foliage. Vigorous growth.

POLYANTHA

Polyanthas are bushy little everblooming Roses, secaraly ever out of flower during the whole season. They are seldom more than 18 inches high, even harder than Hybrid Teas, and bear small flowers in enormous, many-flowered clusters. Prices: two-year-old field grown, 40c each: $4.00 per dozen.

The Best RED. Medium to small, bright flowers borne in large clusters. Continuous blooming and hardy.

The Best PINK. Shining, bright pink blooms of fairly large size. The strong bushy plants, 2 feet high, are almost always in bloom.

The Best WHITE. Round, egg-shaped buds and fairy large, round flowers of pure white. Very dwarf and blooms in compact clusters.
CLIMBERS

Two-year-old field grown, 40c each;
$4.00 per dozen

CL. AMERICAN BEAUTY. Brilliant carmine flowers of exceptionally fine form and rich perfume, borne in clusters on a moderately strong, fairly healthy plant. Perfectly shaped flowers.

CL. COLUMBIA. Pale pink bloom of a sport from Columbia bush rose, comparatively thornless and blooms throughout the season.

CL. KAISERIN AUGUSTA VICTORIA. The best white climbing rose. Pure white, shading at base of petals to a light cream, very fragrant.

CL. RED RADIANCE. A sport from the bush Red Radiance and like it except that it is a vigorous climber.

CL. TALISMAN. Same shade, same qualities as Talisman bush rose, except its climbing habit.

DR. VAN FLEET. Pale pink buds and flowers equal in form and size to the finest hybrid teas. Borne on long individual stems. Undoubtedly the best of the climbers Supreme in vigor.

MARY WALLACE. Large, very bright pink flowers illuminated with shining gold; double, cup-shaped, moderately fragrant. Plant of splendid vigor, 10 to 15 feet high and has superb foliage.

PAUL'S SCARLET. Intense scarlet flowers of excellent shape and moderate size, borne in small clusters. Plant of moderate growth, foliage good, blooms very liberally at its season.

American Beauty Roses

Dear Sirs,

I am writing you to let you know how much I like my Betty Uprichard Roses that I purchased from you.

I thought you would appreciate knowing that I received them in good condition and am well pleased with them.

Yours very truly,
Mrs. John W. Holub
Tampa, Kan.

Mrs. J. A. C. Newman in peach orchard showing trees 16 months after they were planted

We Are Conveniently Located on U. S. Highways 71 and 62—You Are Always Welcome

Trees Are Much Finer and Fruit Larger and Better

August 8, 1939

Dear Sir:

About the first of April in 1938 I ordered one hundred and ten peach trees from you, twelve to eighteen inches high. These trees were J. H. Hale, Belle of Georgia, Early Elberta, Late Elberta, Red Bird Cling and Krummel October.

I had already received an order of twelve peach trees and four apple trees from another nursery company. After setting all these trees out I had a little more land, so decided to put in apple trees. I sent in a rush order to you for twelve apple trees. The twelve apple trees I received from you cost me $2.00, and the four apple trees I received from the other nursery cost me $2.00. I lost three of the four in six years, but did not lose a one of the twelve purchased from you, and it was the first of May when I set them out.

A representative from a nursery visited our orchard recently and said it was one of the best young orchards he had ever seen.

These young peach trees, set the middle of April in 1938, bore ten bunches of large delicious peaches this year, 1939, which were used in our home.

The trees I received from you are much finer and the fruit larger and better than from any other tree I have ever tried.

I am enclosing a Kodak picture taken August the first 1939 which will speak for itself about my fine Benton County Nursery peach trees. You can see by the size of these trees, I can count on a good yield another year.

Everyone who sees my orchard cannot believe it is only one year old trees.

I have Lima beans and okra between the peach rows.

Very respectfully,

J. A. C. Newlan,
R. No. 3, Box 114,
El Dorado, Arkansas.
Hardy Water Lilies
Aquatic Plants

Nowhere in the United States can we grow to better advantage the ever-blooming water lilies, and the moisture-true loving water margin plants. Our long summers, with plenty of bright sunshine, afford a wealth and brilliance of bloom unsurpassed in the cloudier sections.

A concrete pool with overflow and drain can be constructed at little expense. With proper plantings of aquatic moases and lilies and with gold fish to keep down mosquitoes, the water will remain clear and pure. It is only necessary to replace the water lost from evaporation and to clean once or twice a year.

ROSE AREY. Starry cerise pink; intensely fragrant flowers of exceptional size, profuse bloomer. One of the most popular lilies. $1.50.

PINK OPAL. Graceful, cup shaped flowers of deepest pink and quite fragrant. Good bloomer and one of the best of the pinks. $1.00.

ROSEA. Lovely light pink lily. Good bloomer and a very desirable lily. 50c.

CHROMATELLA. Bright, sulphur yellow with broad curving petals. Blooms in great profusion through the entire season. The leaves are handsome splotched with maroon. Extremely hardy, very vigorous and the most satisfactory of the yellow lilies. 50c.

PAUL HARRIOT. On the opening day, the petals are clear yellow suffused with rose, becoming orange pink on the second day and deepening to red on the successive days. We consider it one of the best all around varieties, blooming profusely and being a sturdy, hardy plant. $1.00.

GLADSTONE. Large, dazzling, white flowers with broad, waxy petals and sulphur yellow heart. Its pure, snowy white makes it a perfect contrast with the colored varieties. Free blooming variety, opening early in the morning as well as early in the season. Very hardy and prolific. $1.00.

ALBIDA. Waxy, white flowers with yellow centers. Profuse bloomer and very hardy. 50c.

WATER HYACINTHS

The plants float in water but like the roots in a cool place, particularly among the lily pads where they do not drift about. Delicate spikes of lavender flowers. 10c each.

JAPANESE ARROWHEAD. Spikes of butterfly-like blossoms and arrow shaped leaves Thrive well in shallow water, very thrifty. 5c each.

Had Fine Success

August 7, 1939

Gentlemen:

Wish to thank you for your catalogue received and for your honest business-like treatment.

It may interest you to learn of the success I had with my purchases from you. In the early Spring of 1934, I bought 34 Concord grape vines, which bore fruit the next year and have continued to bear a wonderful crop every year.

In 1937 there was such a bountiful crop and greatly admired by my friends, I decided to have a picture of them made, and I am sending you one of them. That year I sold 18 bushels at a dollar a bushel, and gave away several peonies. They have a wonderful crop this year and so many my they never have seen anything to equal it.

I also purchased 12 Elberta peach trees, a Plum tree and several red and yellow Delicious apple trees. They have borne wonderful fruit and I have won several prizes on them at Paris Fairs.

My orchard is a living demonstration of the economy of buying fruit trees from the Benton County Nursery Company, for which I thank you. I certainly can recommend your company for fine, healthy stock, well rooted, low price and prompt shipment, also courteous treatment.

Yours truly,

BENTON COUNTY NURSERY CO., ROGERS, ARKANSAS
